6 Troubleshooting

Which part should I read?
Participants: Parts 1, 2, and 6. Coaches: Parts 1, 3, and 6. Institution admins: Parts 1, 4, and 6. Admins: all parts.

Screenshots use sample data. Names, scores, and dates in your account will differ.

PART 1

Getting started

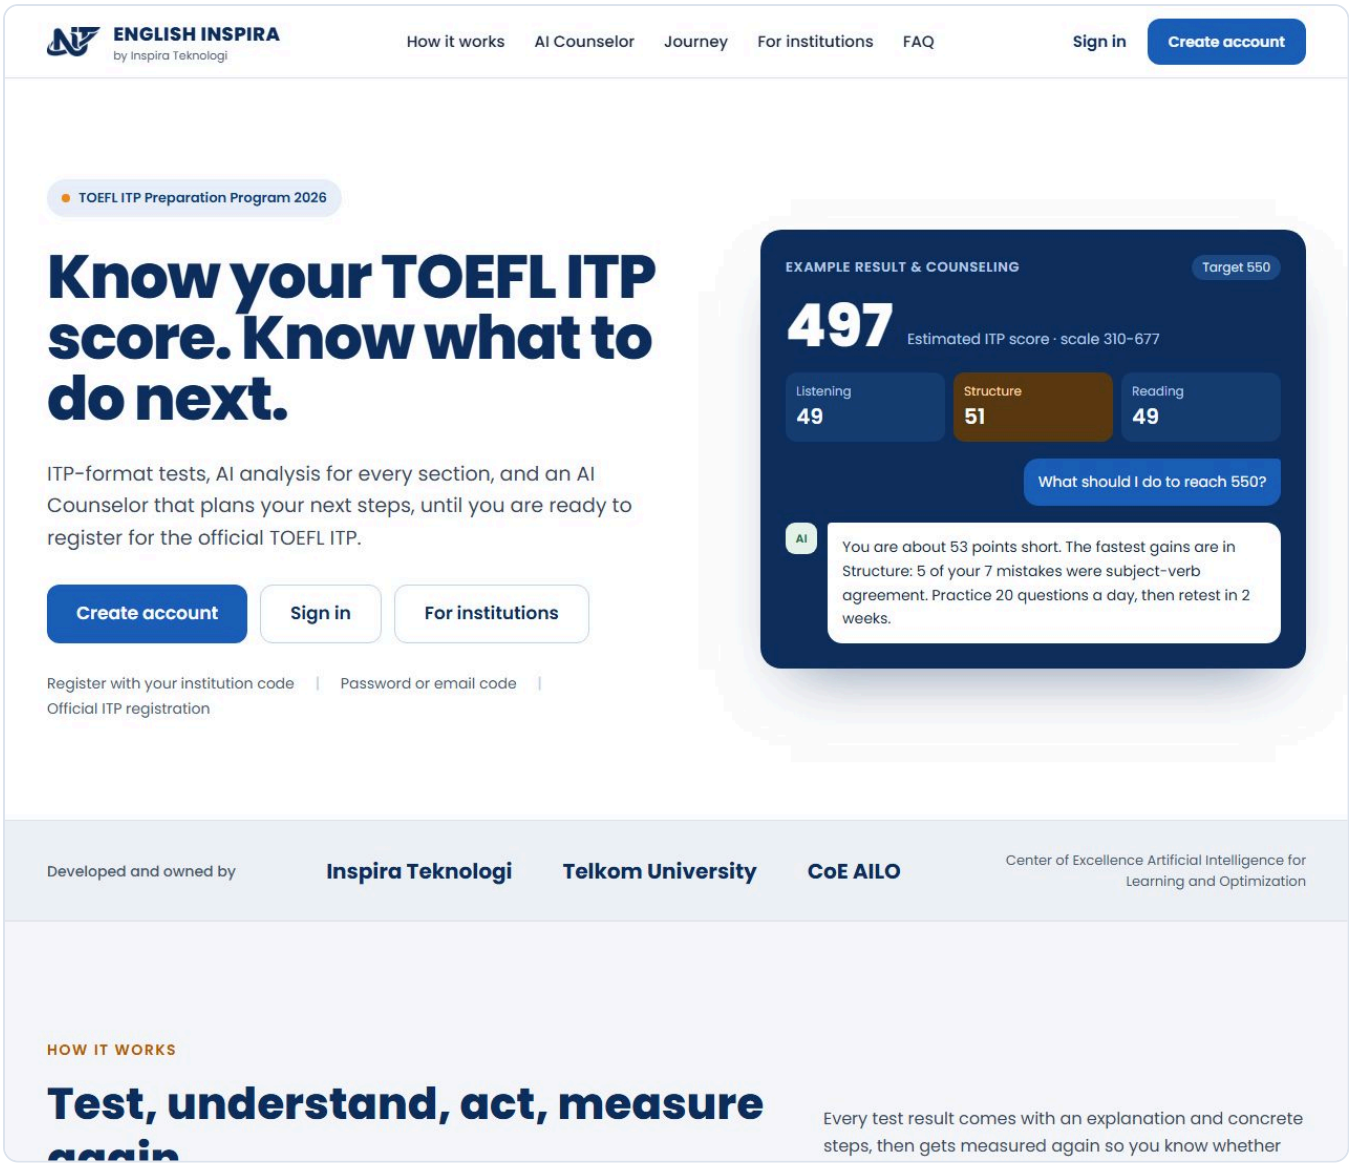

Everything you need before your first sign-in: the website, creating an account, signing in, and the roles in English Inspira.

1.1 What is English Inspira?

English Inspira is a TOEFL ITP preparation platform for partner institutions (campuses, government agencies, and companies). Participants take ITP-format tests, get AI analysis of every result, follow a study plan, book coaching sessions, and finally register for the official TOEFL ITP.

Role	Who	What they do
Participant	Students, employees	Take tests, learn, book coaching, chat with the AI Counselor
Coach	Trainers of an institution	Publish coaching slots, record attendance, write session notes, guide participants
Institution admin	Program coordinator	Invite participants, monitor group progress, download reports
Admin	English Inspira team	Manage institutions, questions, tests, materials, settings, and maintenance mode

The website address is **https://english.edulyfe.id**. It works on laptops, tablets, and phones; tests are best taken on a laptop or PC with headphones.

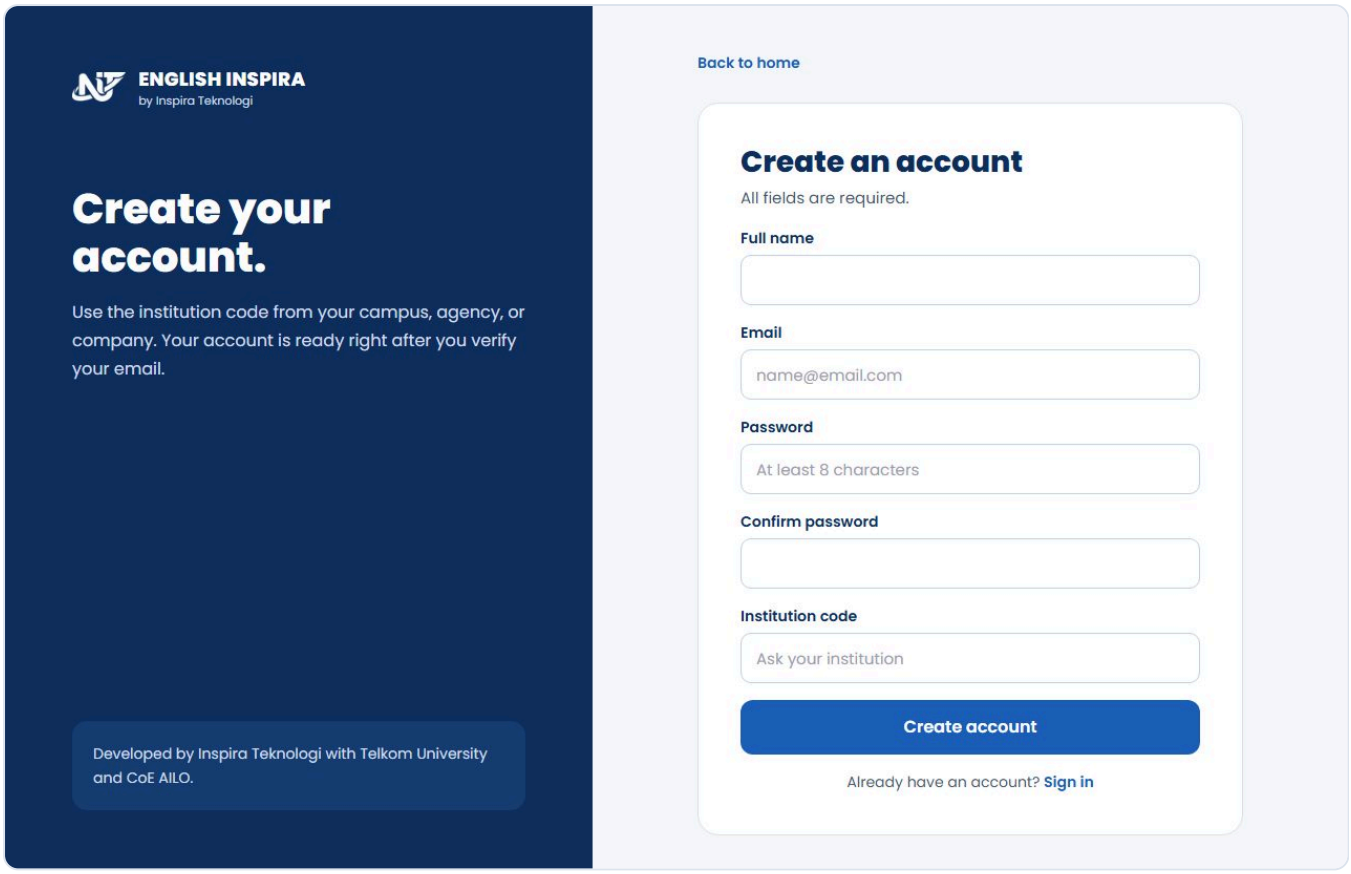

The home page. Use **Create account** or **Sign in** at the top right.

1.2 Create an account (participants)

You need the **institution code** from your campus, agency, or company. If your institution invited you by email, skip this step and follow the link in the invitation instead.

1. Open the website and click **Create account**.
2. Fill in your full name, email, a password (at least 8 characters), and the **institution code**.
3. Click **Create account**. A 6-digit code is sent to your email. The code is in the email subject.
4. Enter the code and click **Verify and continue**.
5. Read and accept the data consent. Your account is now active.

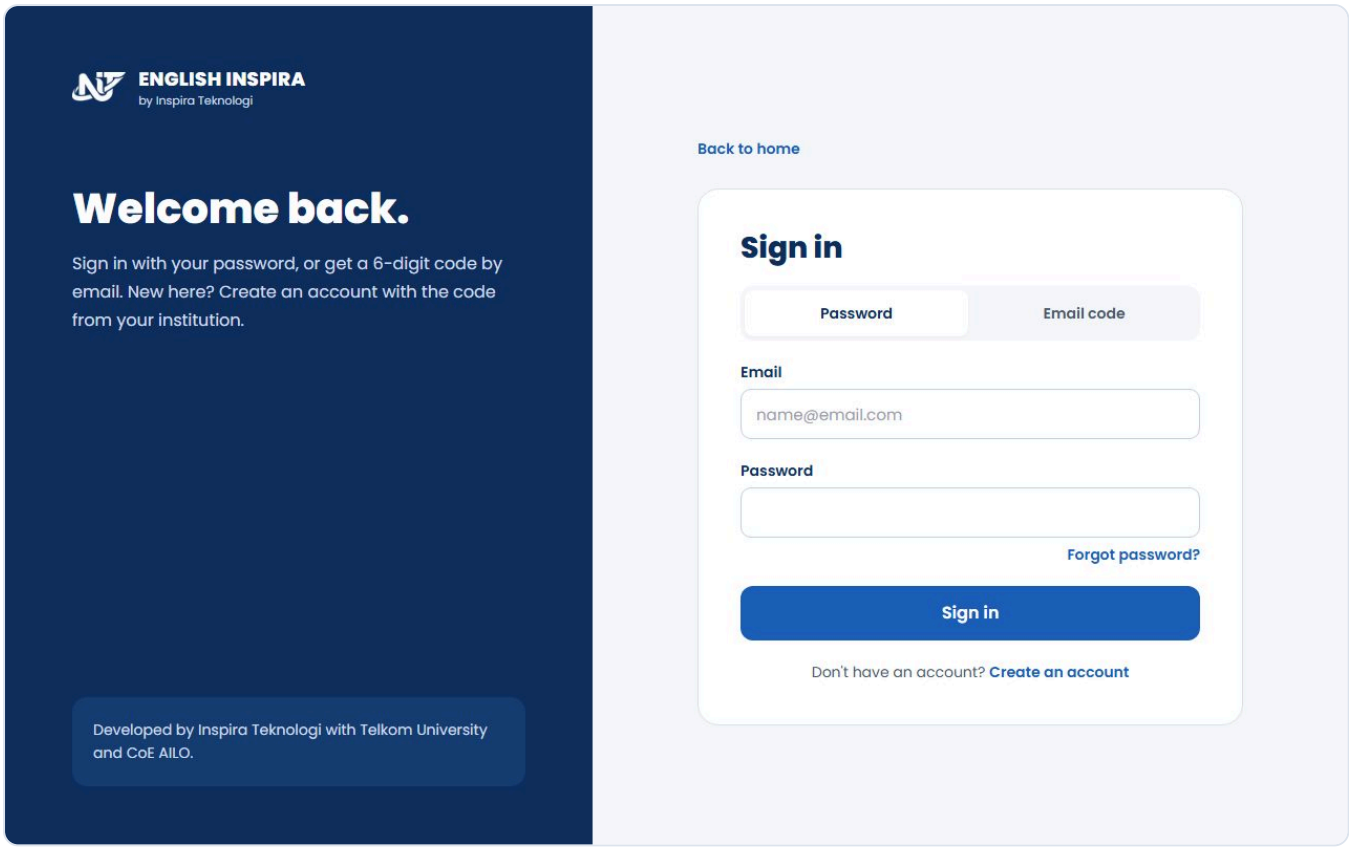

Create account. The institution code is given by your institution.

Important If the code is rejected, check it with your institution. Registration also fails when the institution has no seats left or its contract has ended.

1.3 Sign in

There are two ways to sign in. Both give the same access.

Tab	How
Password	Enter your email and password, then click **Sign in**.
Email code	Enter your email and click **Send code**. Type the 6-digit code from the newest email (valid for 5 minutes, shown in the subject).

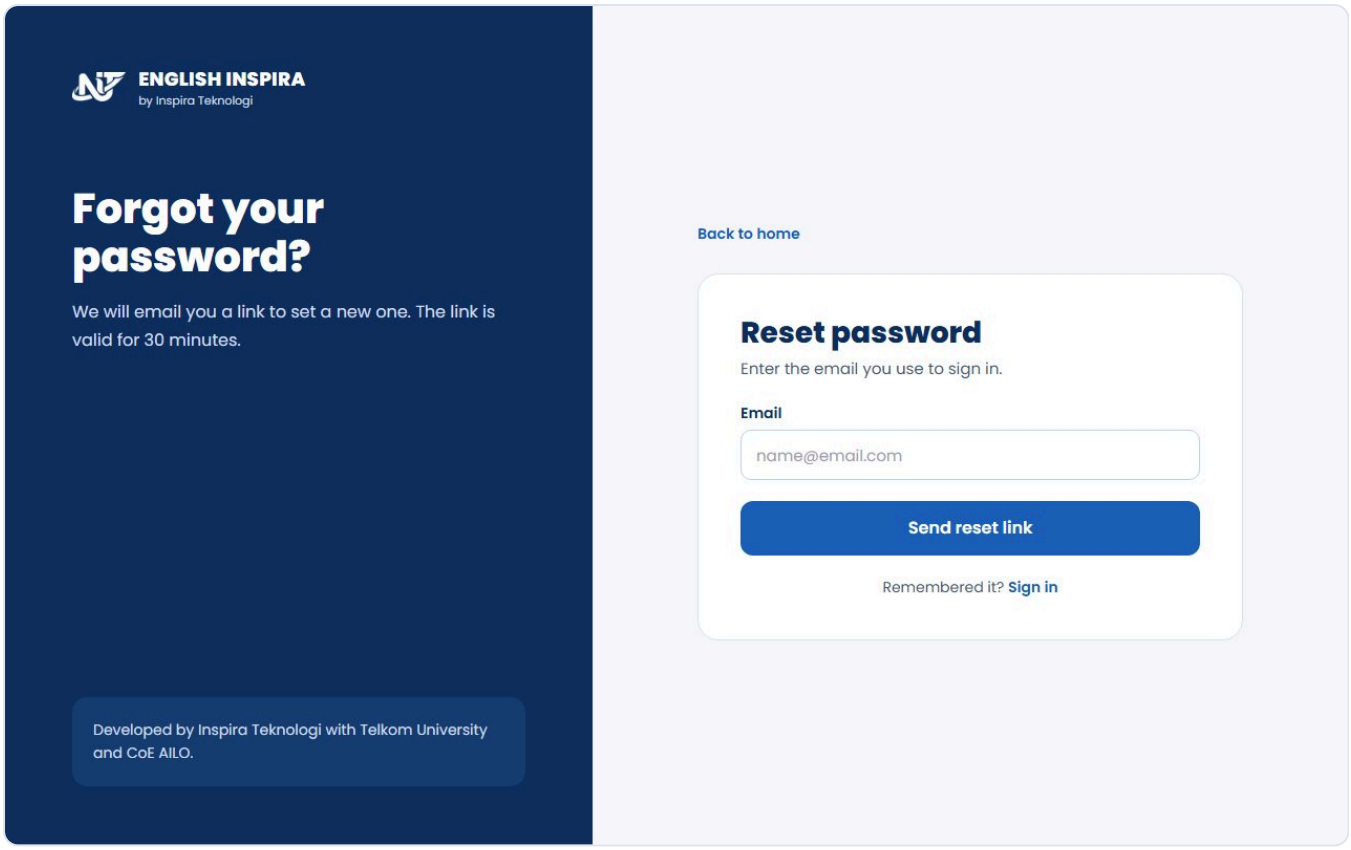

Sign-in page with the Password and Email code tabs.

Tip Invited by your institution and never set a password? Use **Email code** , then set a password in **Profile** . You can also use **Forgot password** .

Forgot password

1. On the sign-in page, click **Forgot password?**
2. Enter your email and click **Send reset link**.
3. Open the email and click **Set a new password** (the link works once and expires after 30 minutes).
4. Enter the new password twice and sign in.

Forgot password.

1.4 Sign out and security

- Click **Sign out** at the bottom of the left menu. You return to the home page.
- Never share your password or sign-in code. English Inspira staff will never ask for them.
- A wrong code locks after 5 attempts. Request a new code and use the newest email.
- Notifications (the bell icon next to your name) show new results, bookings, reminders, and deadlines.

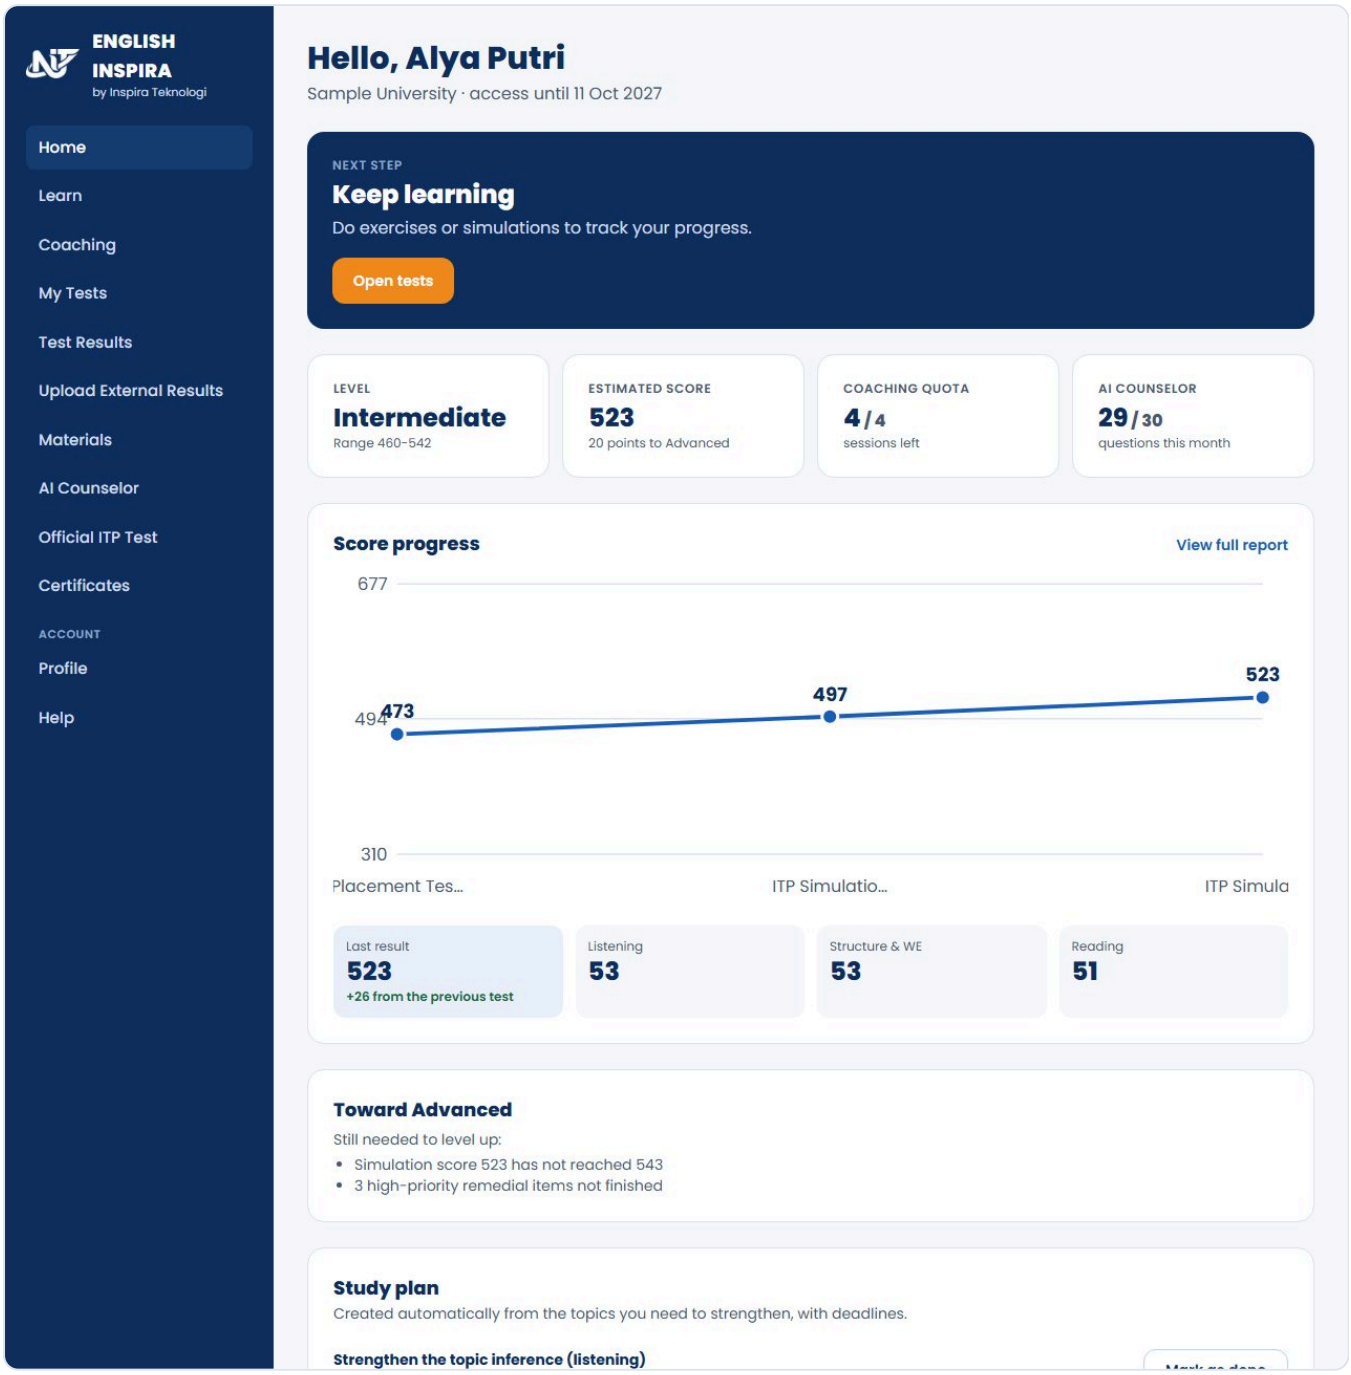

PART 2

Participant guide

> Your path: placement test, level, study plan, learning, coaching, simulations, and finally the official TOEFL ITP.

2.1 Home

Home shows your next step, your **level**, **estimated score**, remaining **coaching quota**, AI Counselor questions left this month, your score progress, and your study plan.

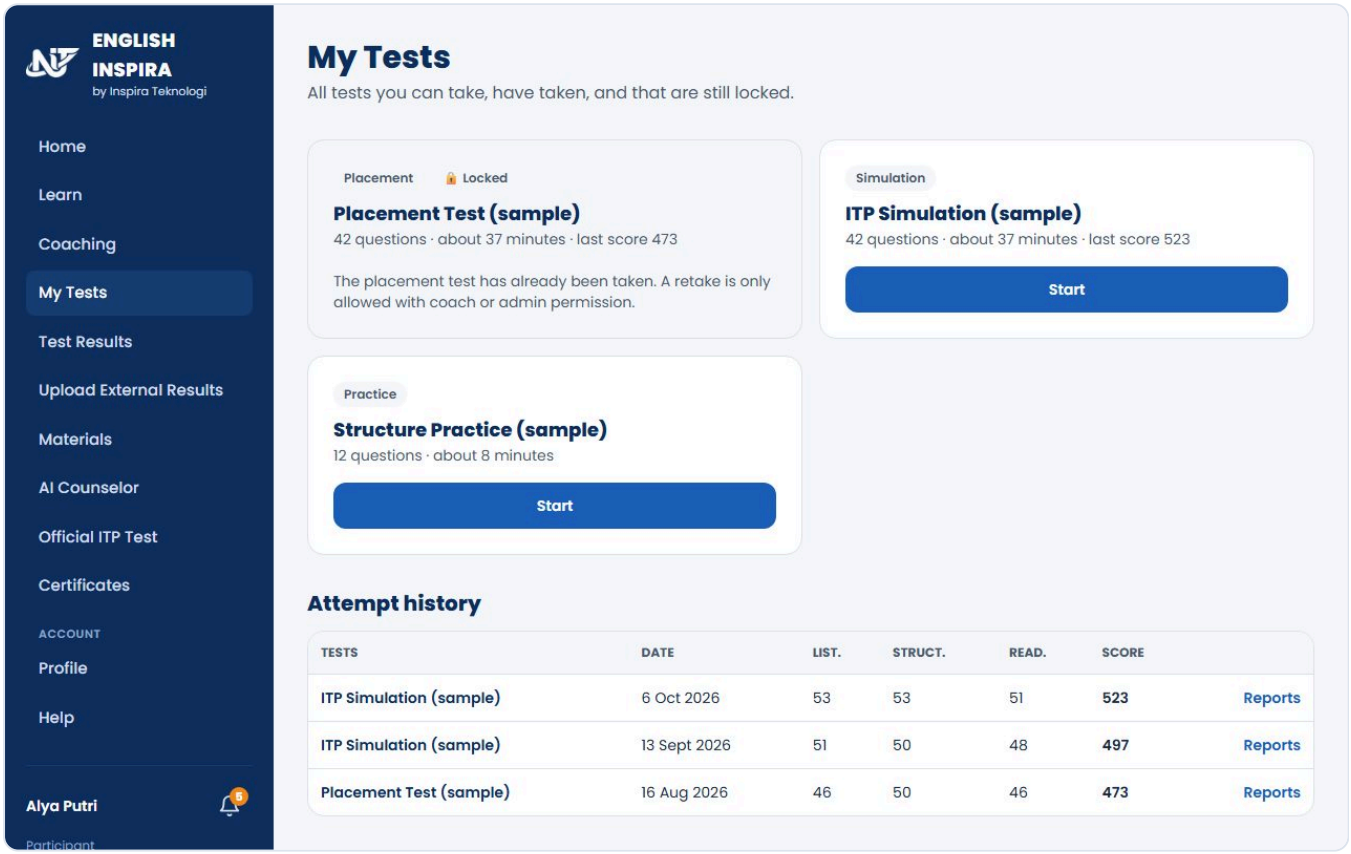

Home: next step, level, score, quota, and score progress.

- **Next step** tells you what to do now, for example take the placement test first.
- **Study plan** lists topics to strengthen with a deadline. Click **Open unit** to study, and **Mark as done** when finished.
- Late items are marked so you and your coach can see them.

2.2 Tests

Open **My Tests**. There are three kinds of tests:

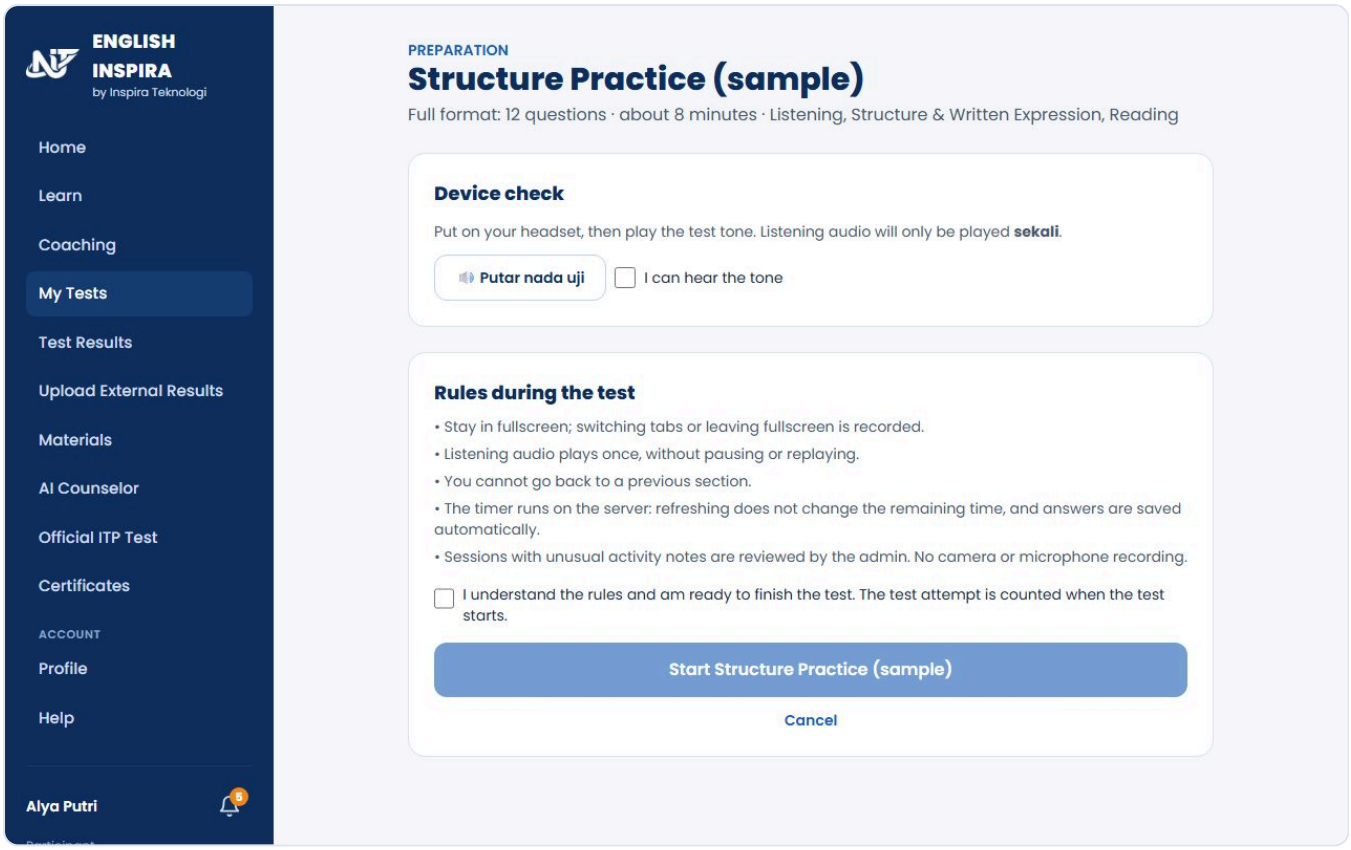

Test	Purpose
Placement test	Taken once at the start. Sets your level (Basic, Intermediate, Advanced) and your coaching quota.
Simulation	Full TOEFL ITP format. Use it regularly to measure progress and move up a level.
Practice	Shorter exercises for a single section.

My Tests and your attempt history.

Before the test

Clicking **Start** opens a preparation page: check your audio (play the test tone and tick that you can hear it) and read the rules. The timer only starts after you click **Start** on this page.

Preparation page: device check and test rules.

During the test

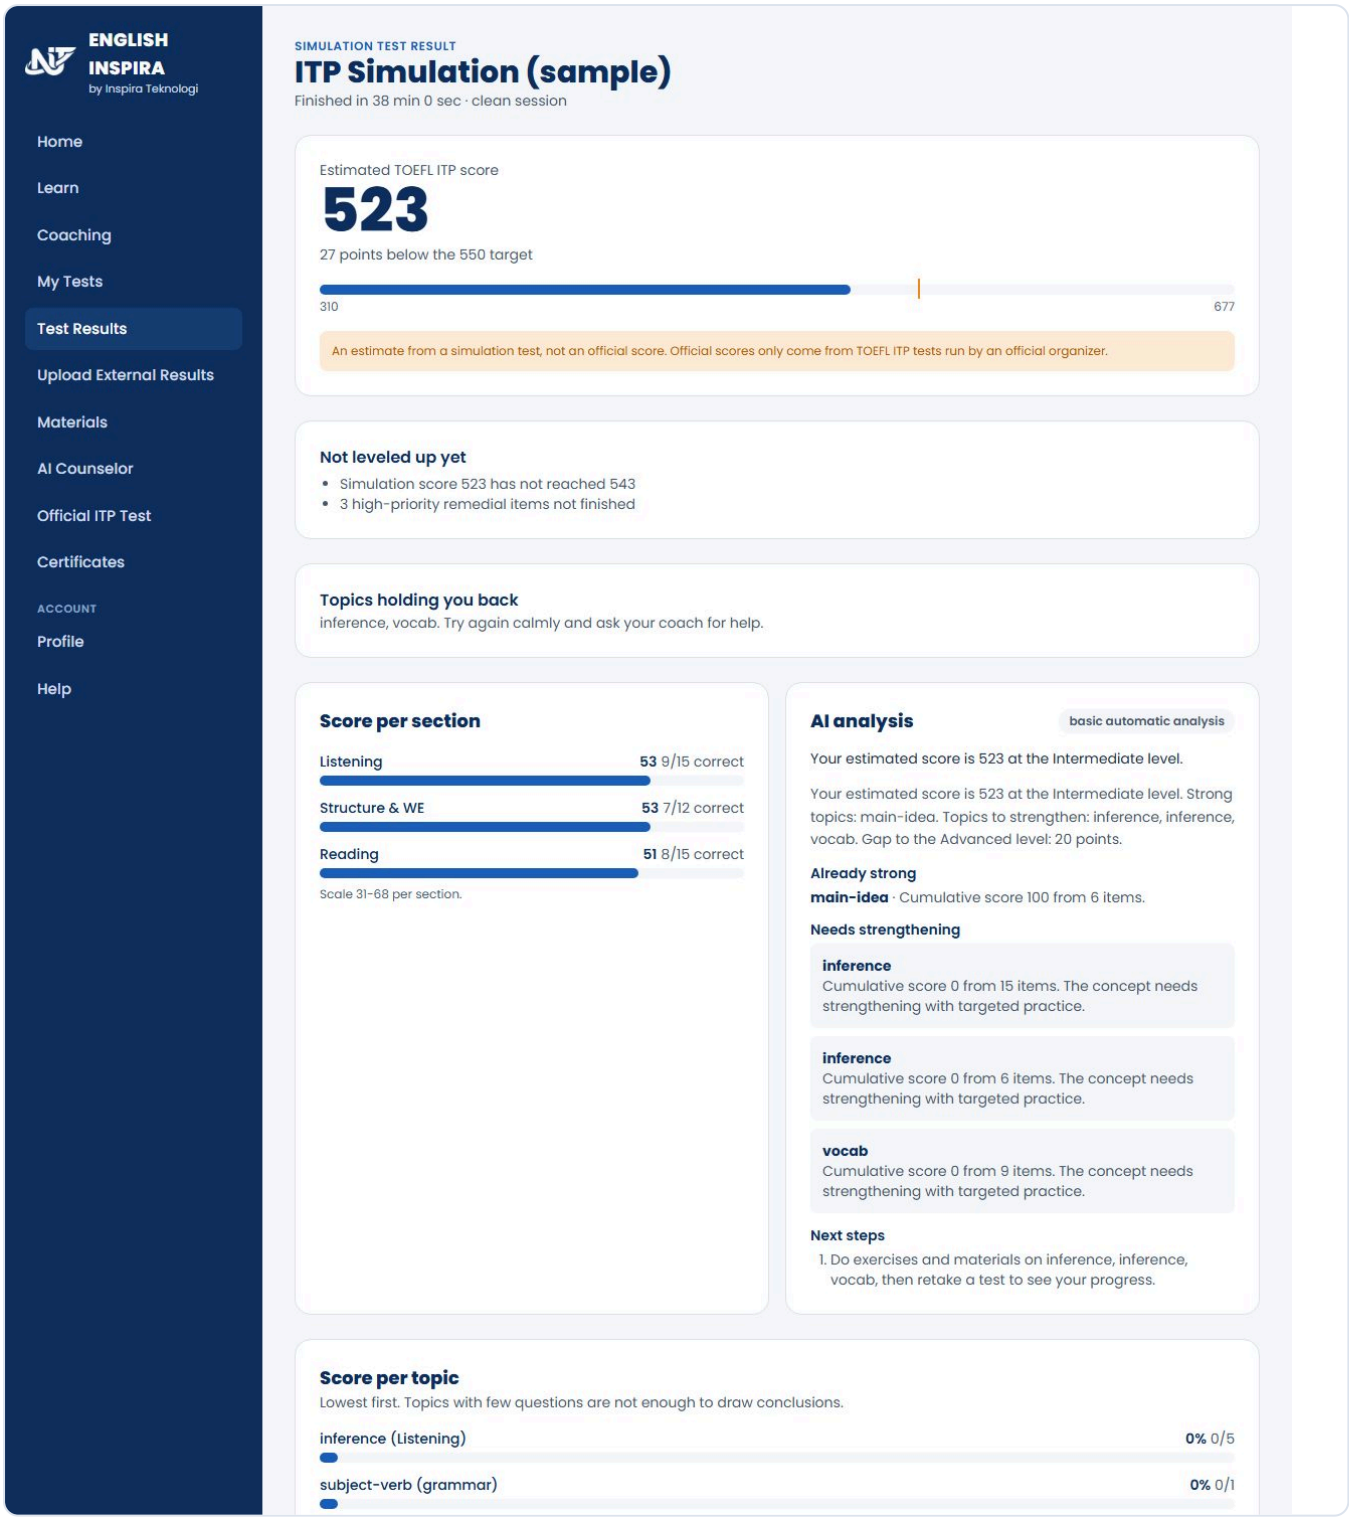

- Each section has its own timer, kept by the server. Refreshing the page or losing the connection does not reset the time or lose answers.
- Answers are saved automatically.
- Listening audio plays **once**, like the real test.
- You cannot go back to a previous section after finishing it.
- The test room runs in fullscreen. Leaving the test tab is recorded and may be reviewed by the admin.
- If a test stops halfway, open **My Tests** and click **Continue**.

2.3 Results and AI analysis

Your score appears right after you finish. The AI analysis (strengths, weaknesses, likely causes, and suggestions) follows a few seconds later.

Test Results: score progress and every attempt.

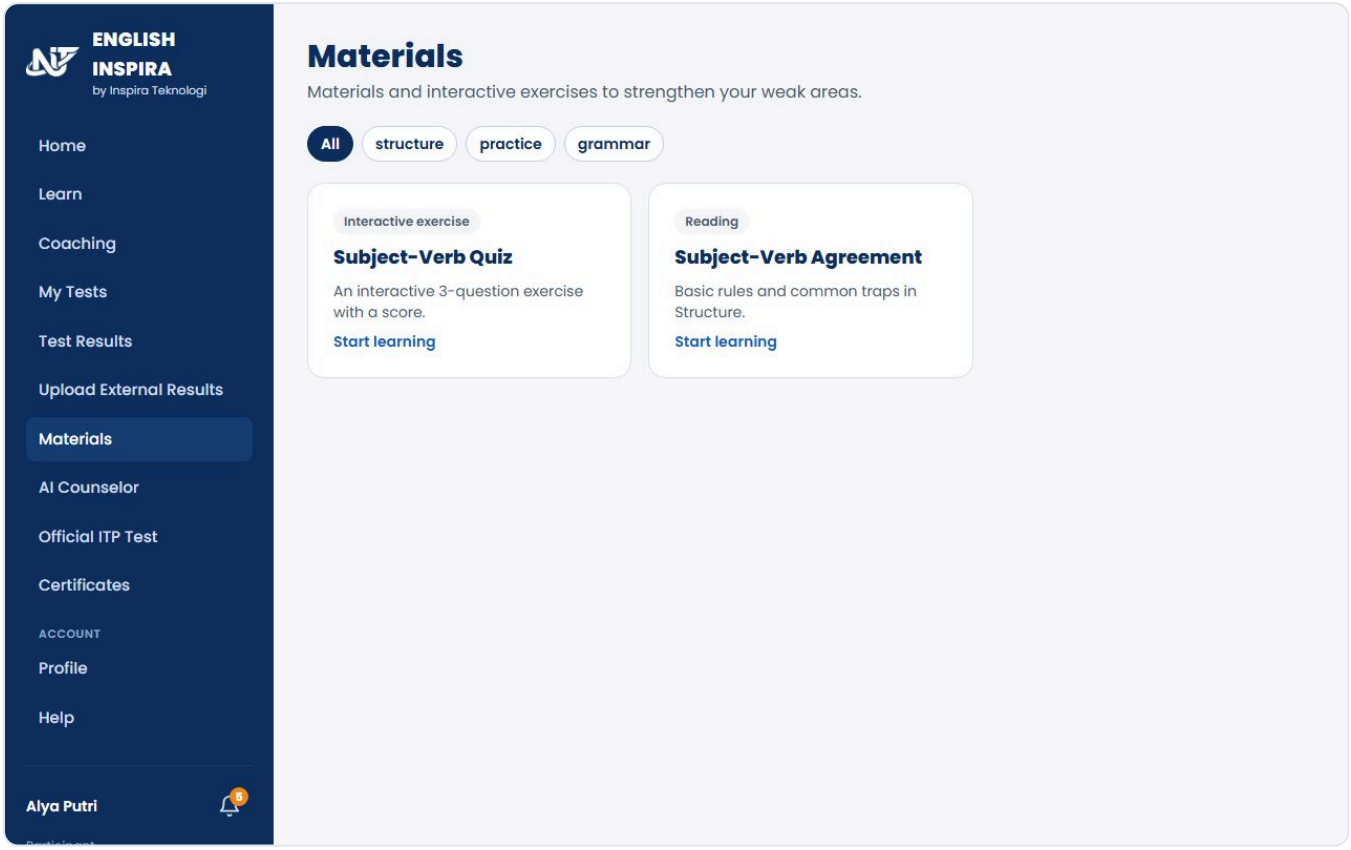

One result: score per section, AI analysis, gap to the next level, and per-question review.

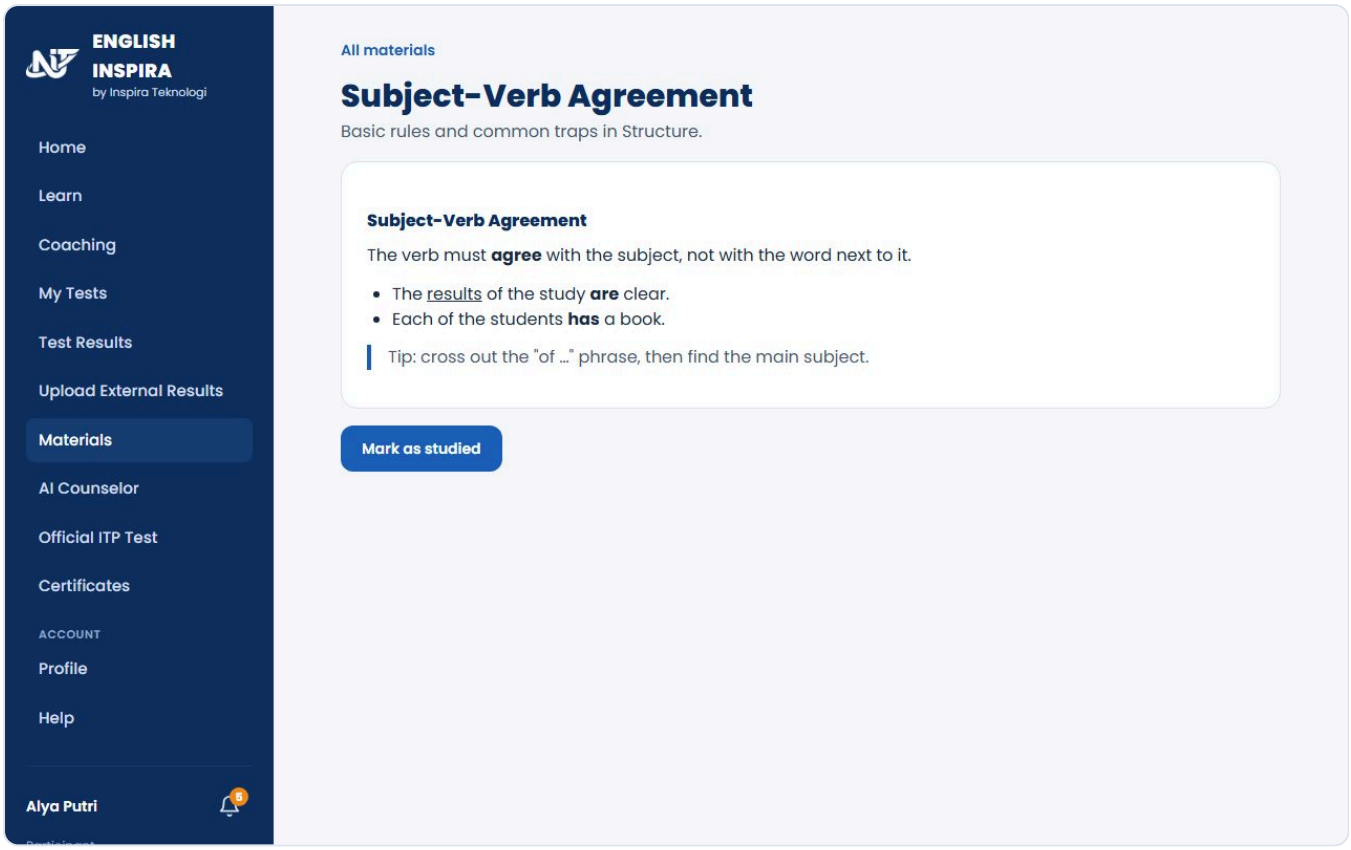

- Scores are **estimates** on the 310-677 scale, not official TOEFL scores.
- Click **Ask the counselor** to discuss this result with the AI Counselor.
- Your study plan is updated automatically after every test.

2.4 Learning and materials

- **Learn** shows the courses and units for your level. A unit is complete when its required materials are done and its quiz is passed.
- **Materials** lists all reading and interactive materials. Filter by tag, open a material, and click **Mark as completed** when done.
- Interactive exercises (quizzes, flashcards, fill in the blank, matching) report your result automatically and update your topic scores.

Materials with tag filters.

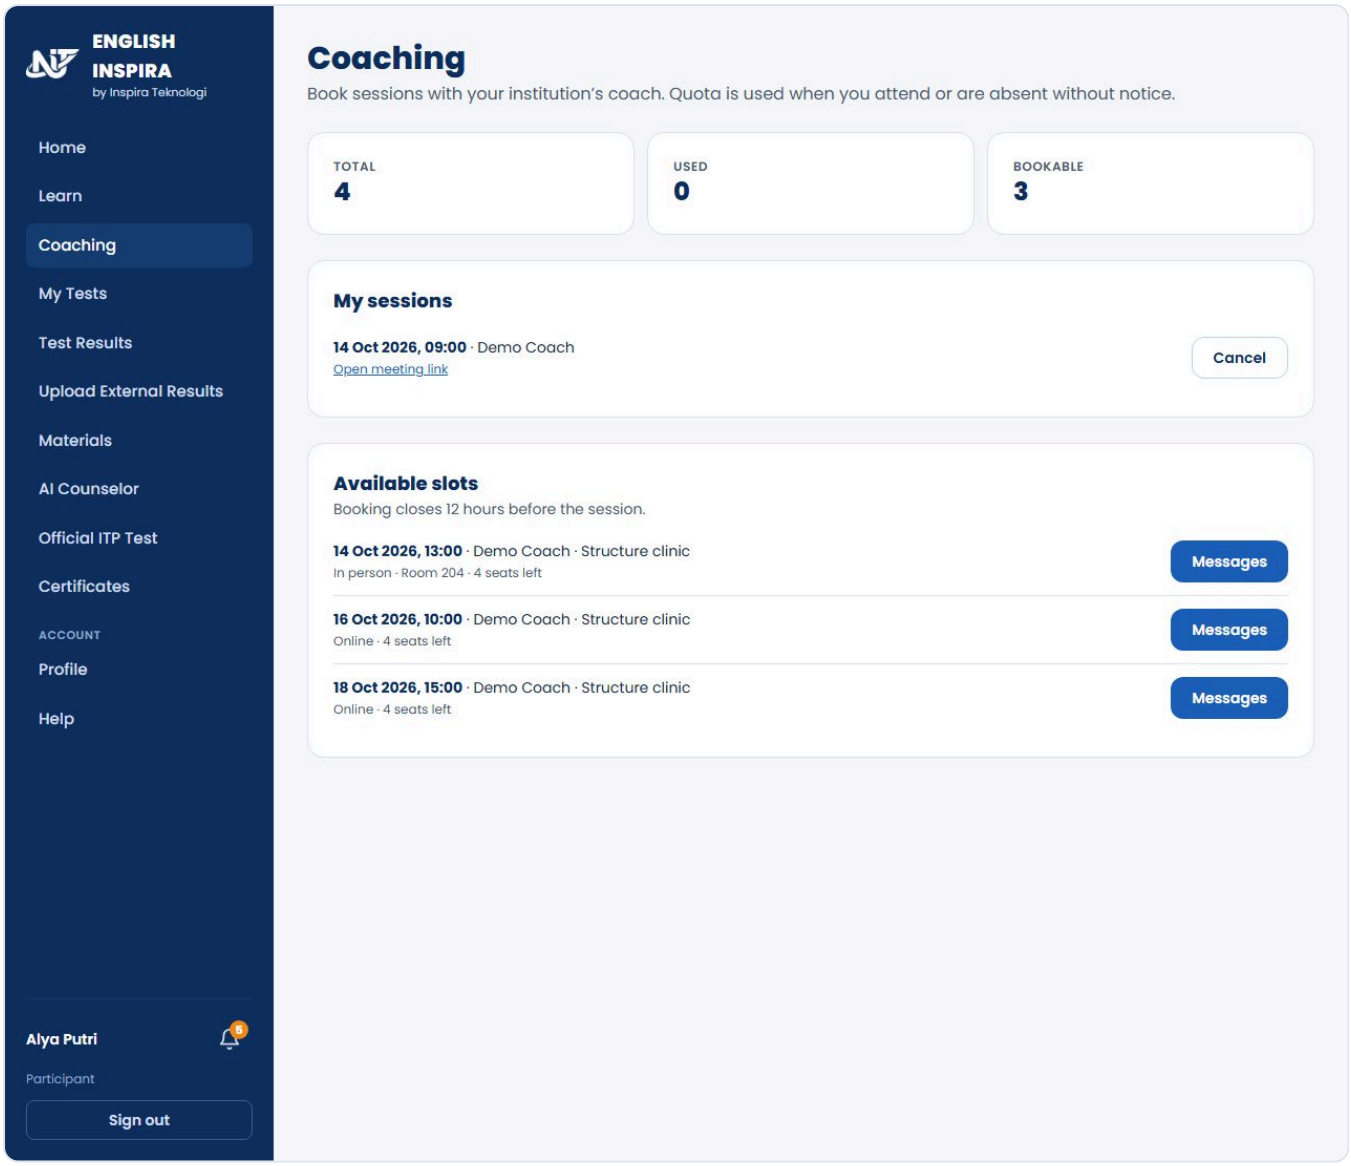

A material page.

2.5 Coaching

Coaches publish session slots. You choose one of the available slots; you cannot create your own time.

1. Open **Coaching**. The top shows your quota and your upcoming sessions.
2. Under **Available slots**, choose a slot and click **Book**.
3. Join on time: online sessions show the meeting link, in-person sessions show the room.

Coaching: quota, my sessions, and available slots.

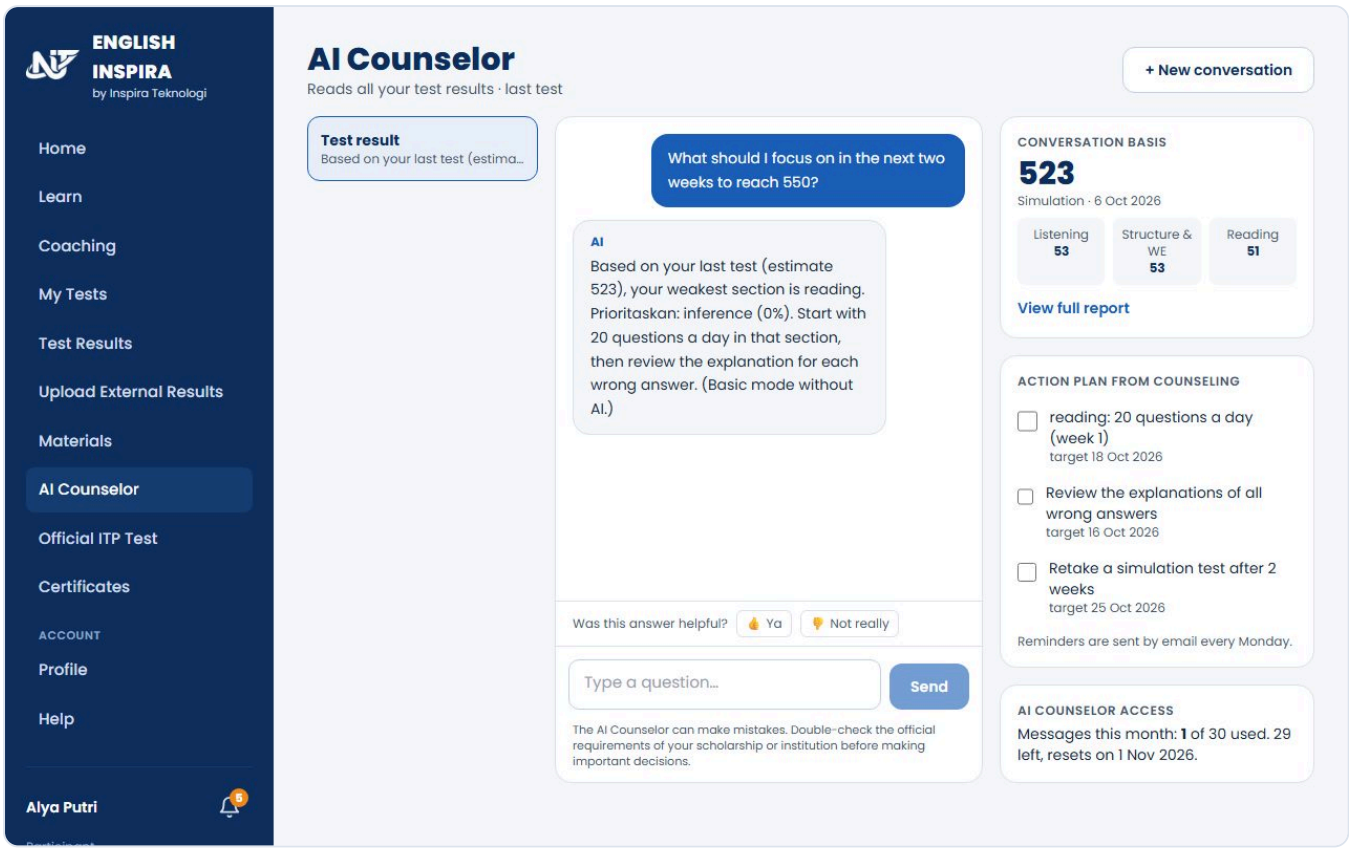

Situation	Quota
Attended	Used
Absent without notice	Used
Cancelled in time (at least 24 hours before)	Not used
Cancelled by the coach	Not used

Tip You can cancel by yourself until 24 hours before the session. After that, contact your coach.

2.6 AI Counselor

Ask anything about your preparation: why a section is low, what to do this week, how long until your target, or whether you are ready for the official test. The counselor reads your results and

study plan.

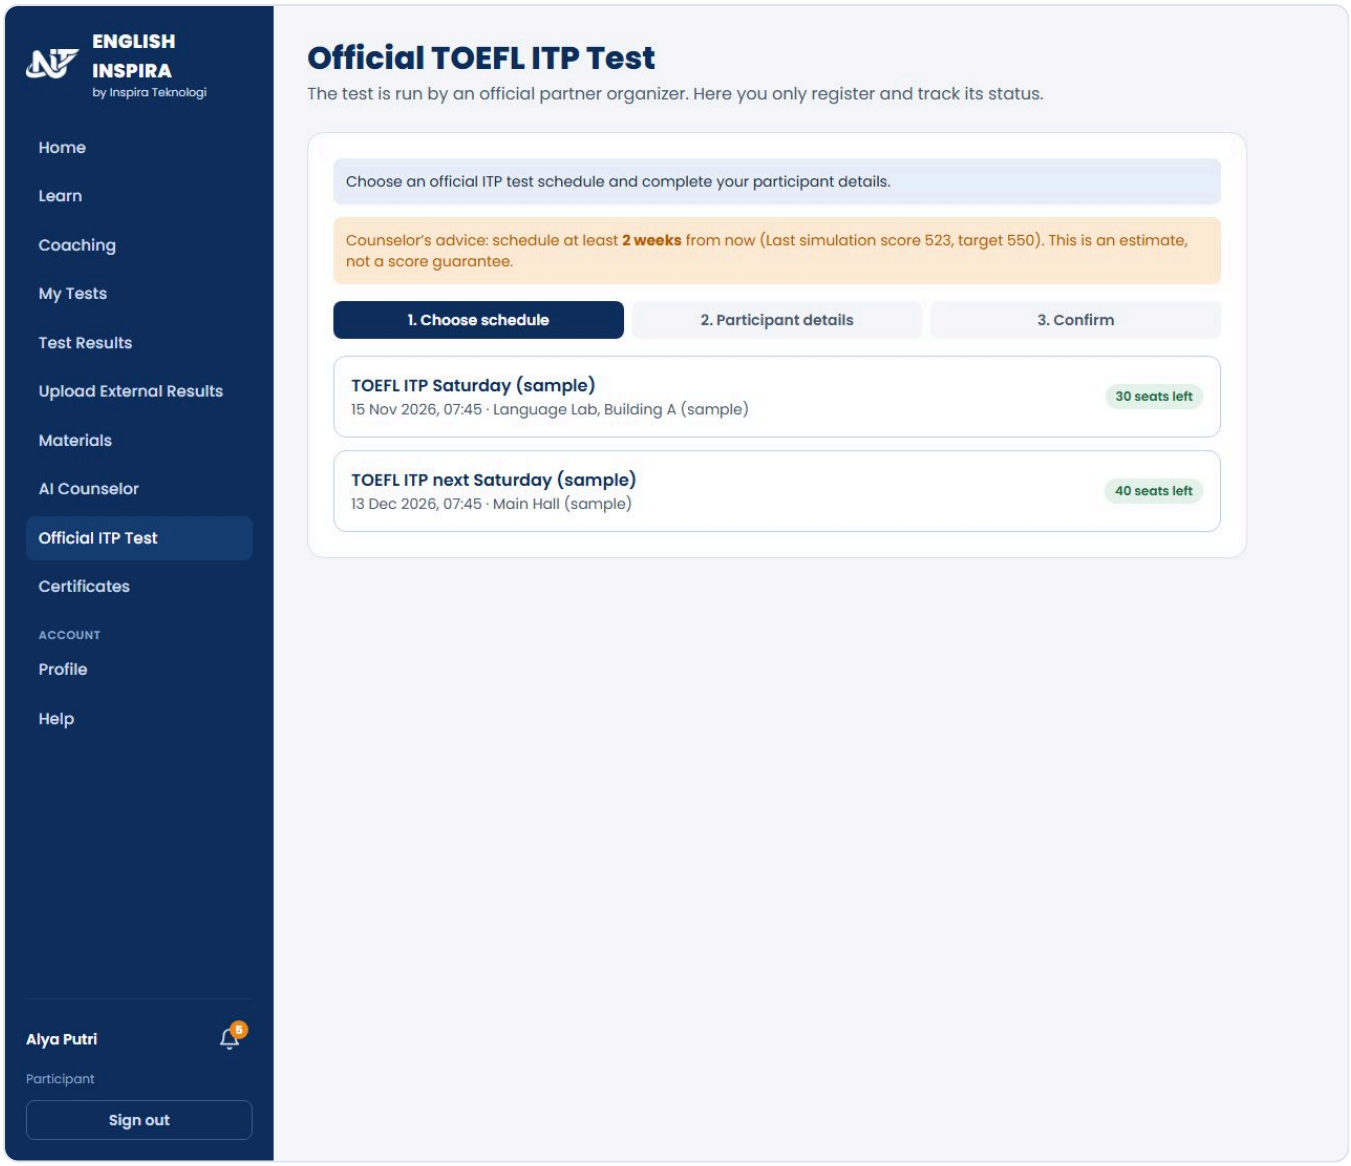

AI Counselor: conversation, suggested action plan, and remaining questions this month.

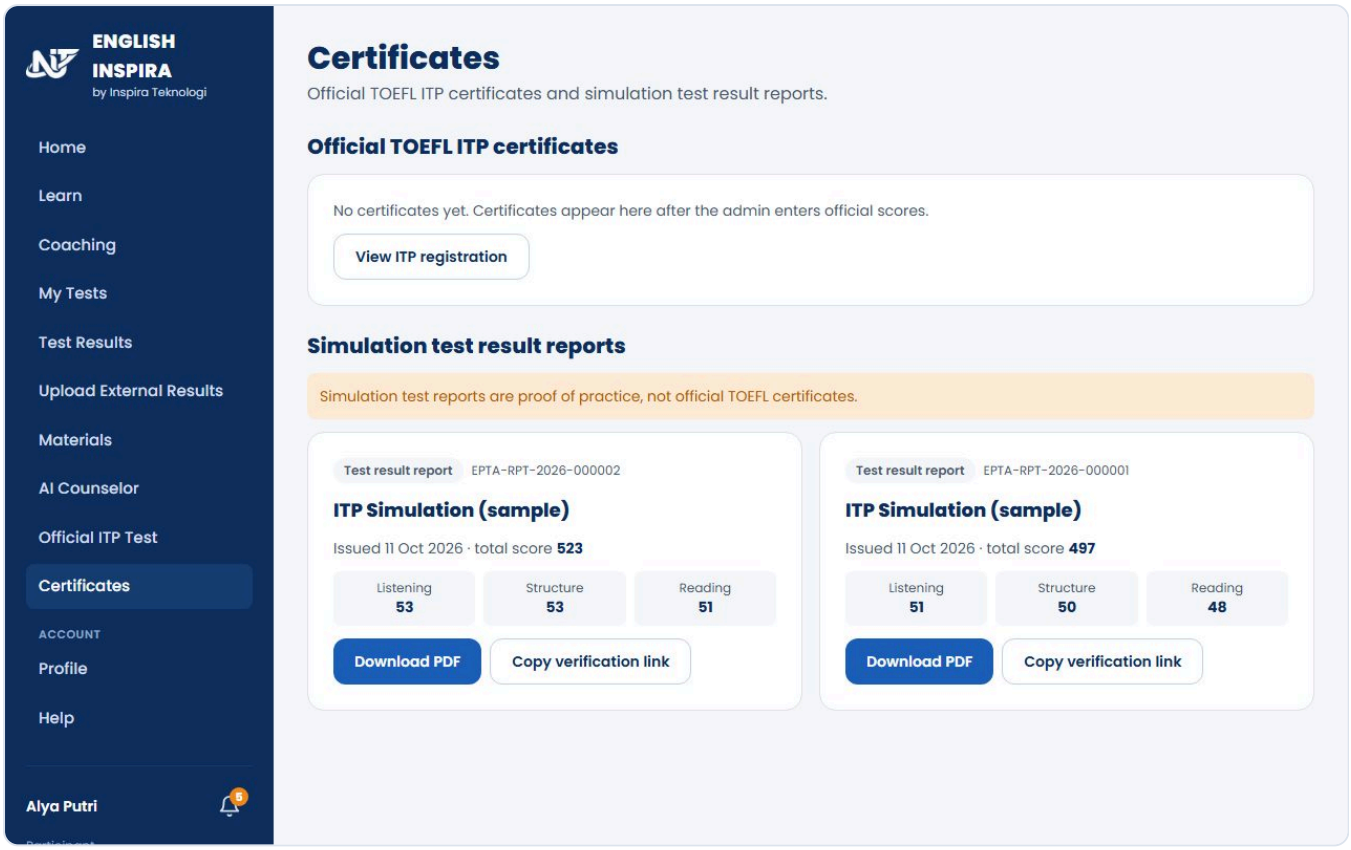

- Click **New conversation**, or start from a test result to discuss it.
- Suggested action items can be ticked off.
- There is a monthly question limit (shown on the page).
- The counselor only discusses TOEFL ITP preparation and never promises a score.

2.7 Official TOEFL ITP and certificates

1. Open **Official ITP Test** and choose an open schedule.
2. Fill in your details exactly as on your ID card or passport, and upload the required documents.
3. Wait for document verification. You will see the status on the page.
4. Take the test on the scheduled date and bring your original ID.
5. After the admin enters your score, your certificate appears in **Certificates**.

Official ITP Test: schedules and registration steps.

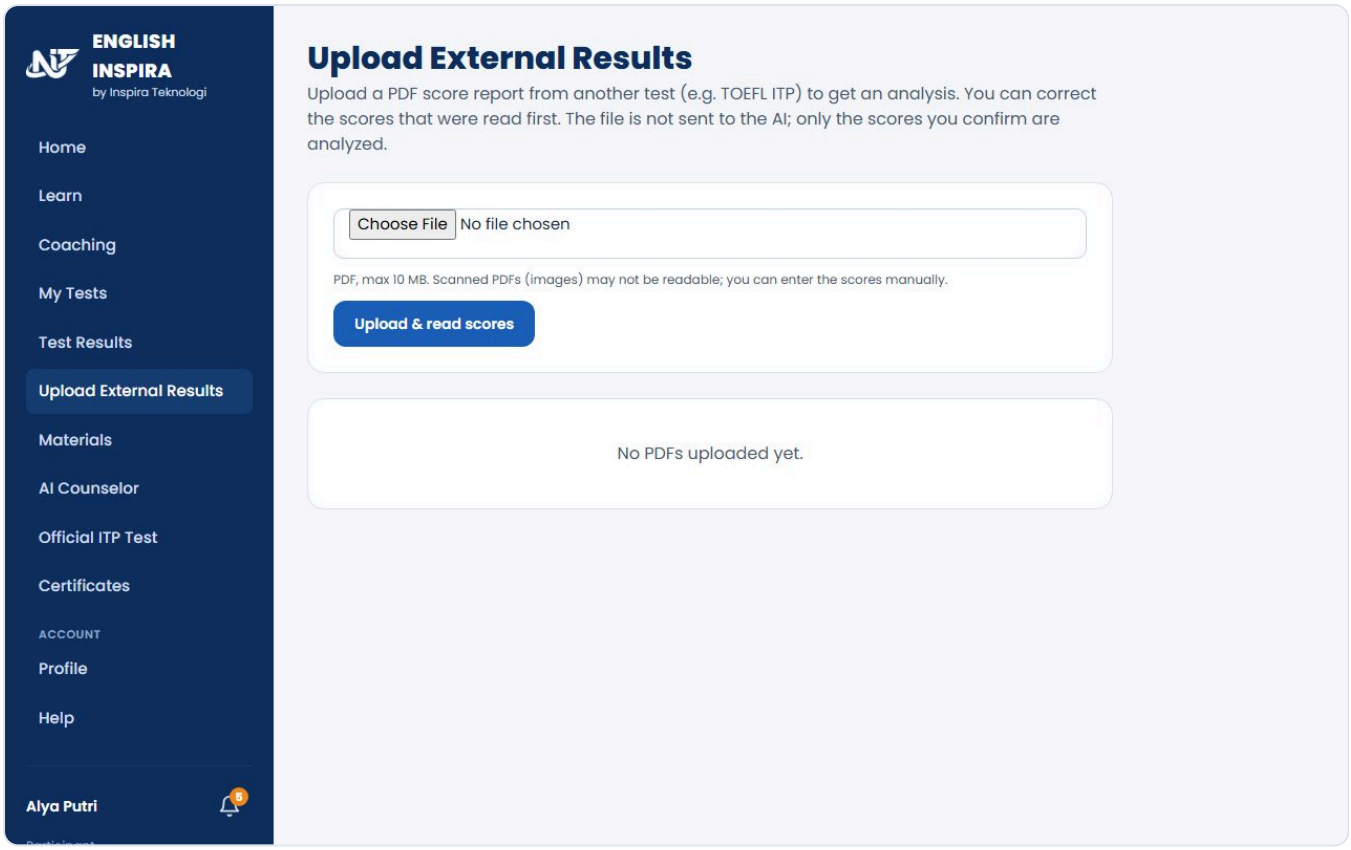

Certificates and simulation reports with a QR verification link.

Important Your name is locked after the registration is submitted. Contact the admin before the test date if it is wrong.

2.8 Upload external results

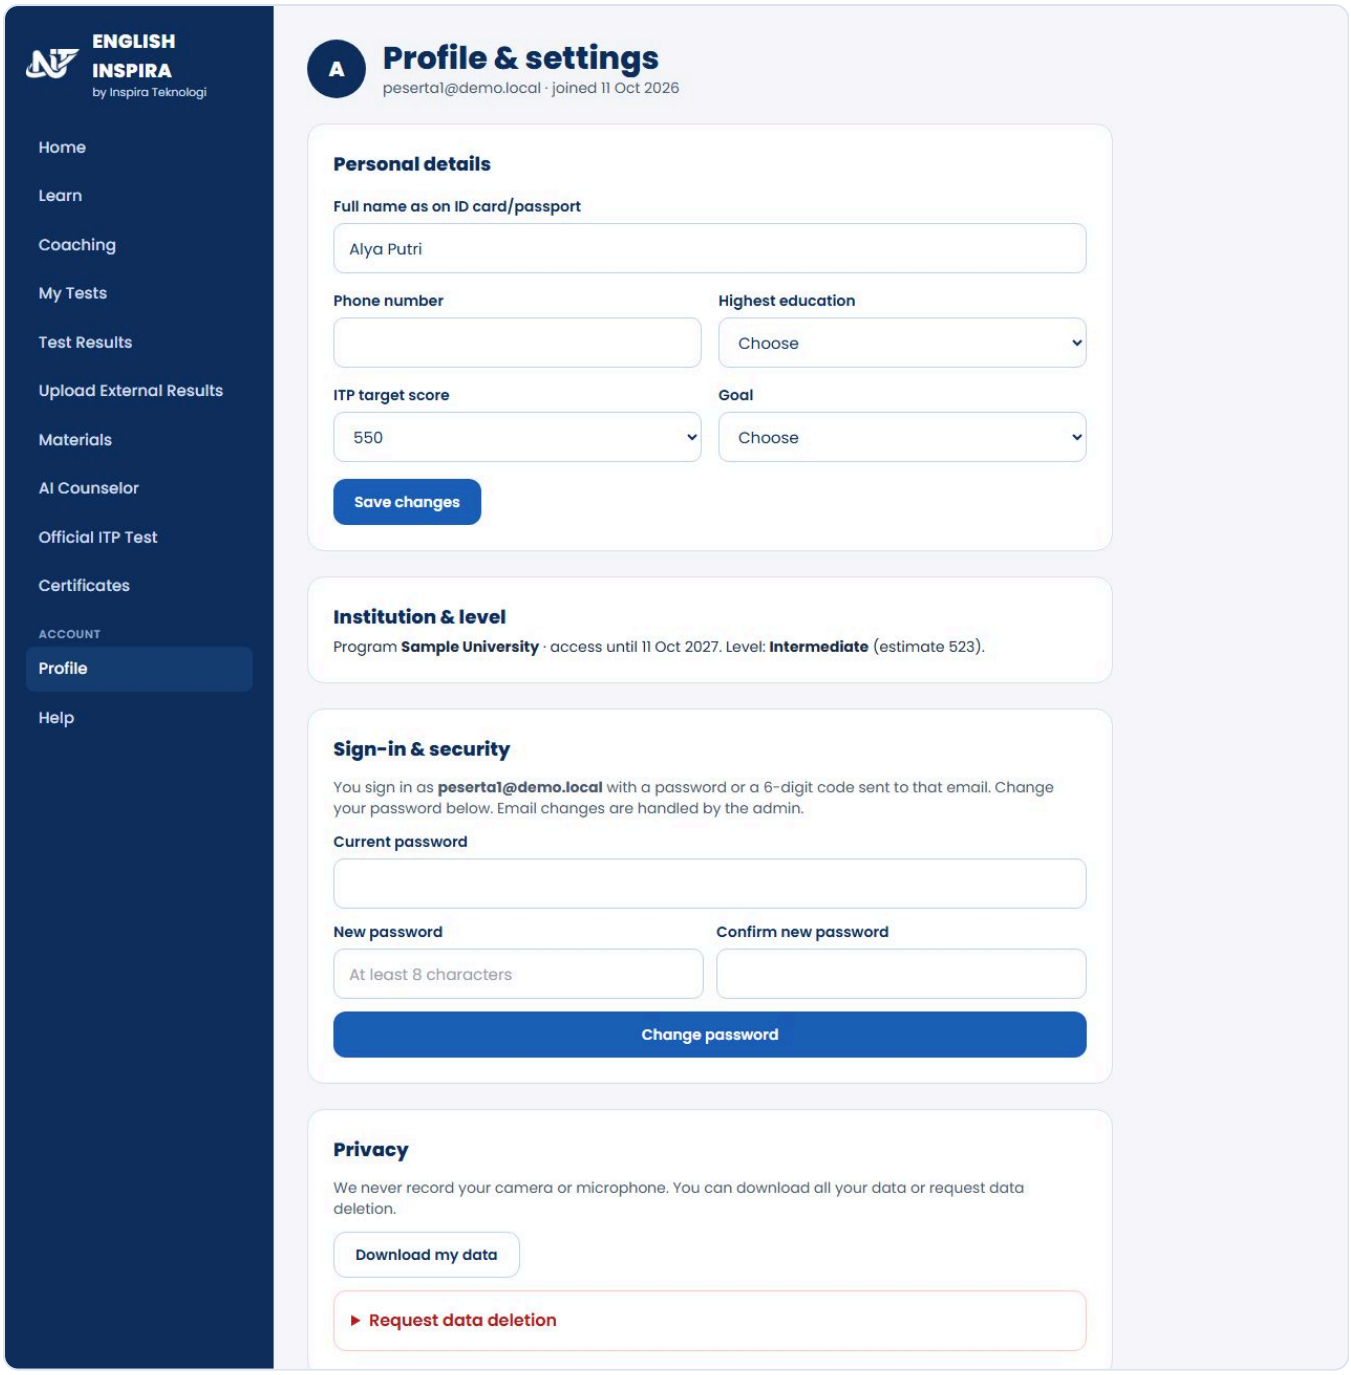

Have a score report from another test (PDF)? Upload it in **Upload External Results**. Check the scores that were read from the file, correct them if needed, then click analyze. The file itself is never sent to the AI.

Upload External Results.

2.9 Profile and help

- **Profile**: update your name, phone, education, target score, and goal.
- **Sign-in & security**: set or change your password.
- **Privacy**: download all your data or request data deletion.
- **Help**: answers to common problems and the support contact.

Profile, password, and privacy.

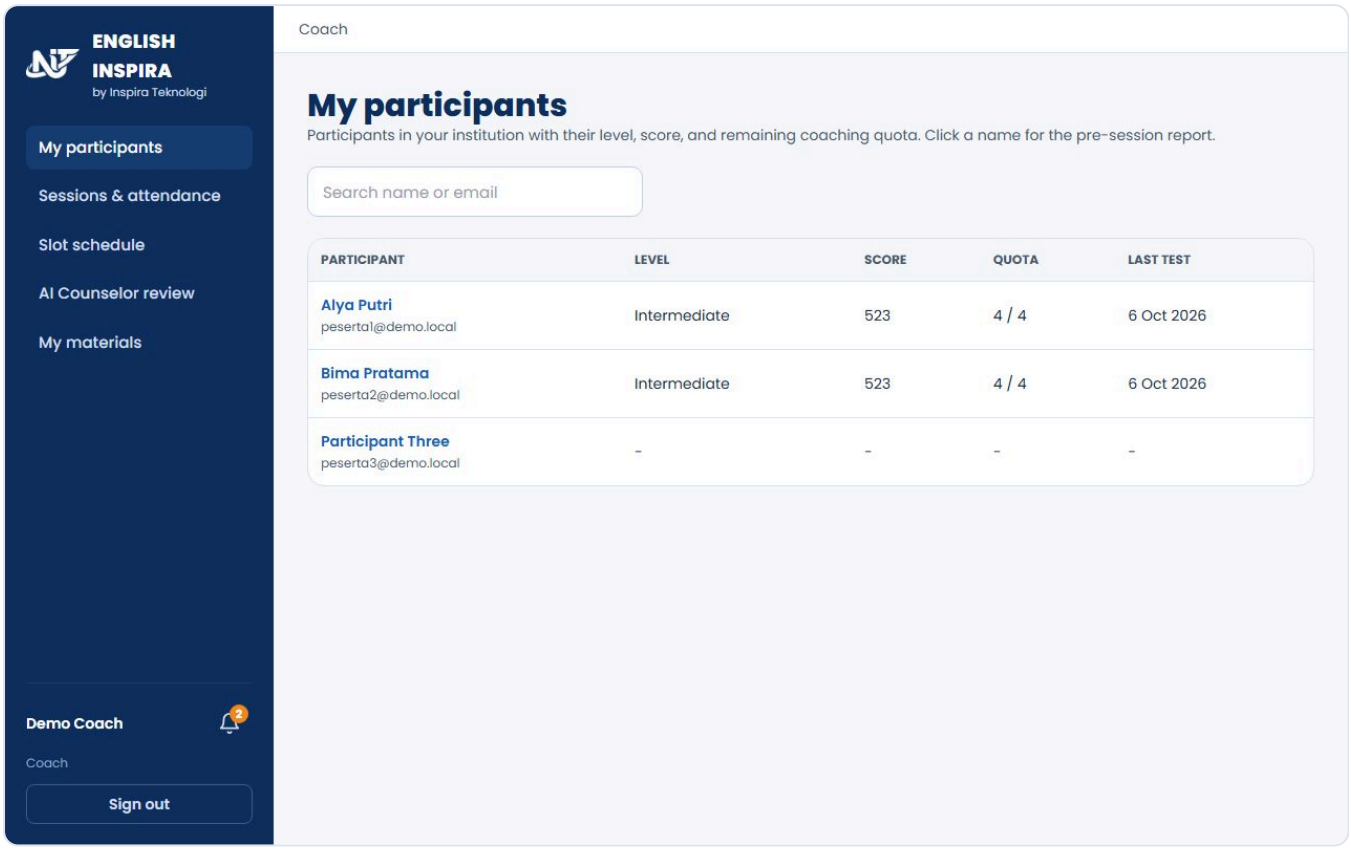

PART 3

Coach guide

Publish your schedule, run sessions, record attendance, and guide each participant with their analysis and study plan.

3.1 My participants

The coach home lists the participants of your institution with their level, score, quota, and last test.

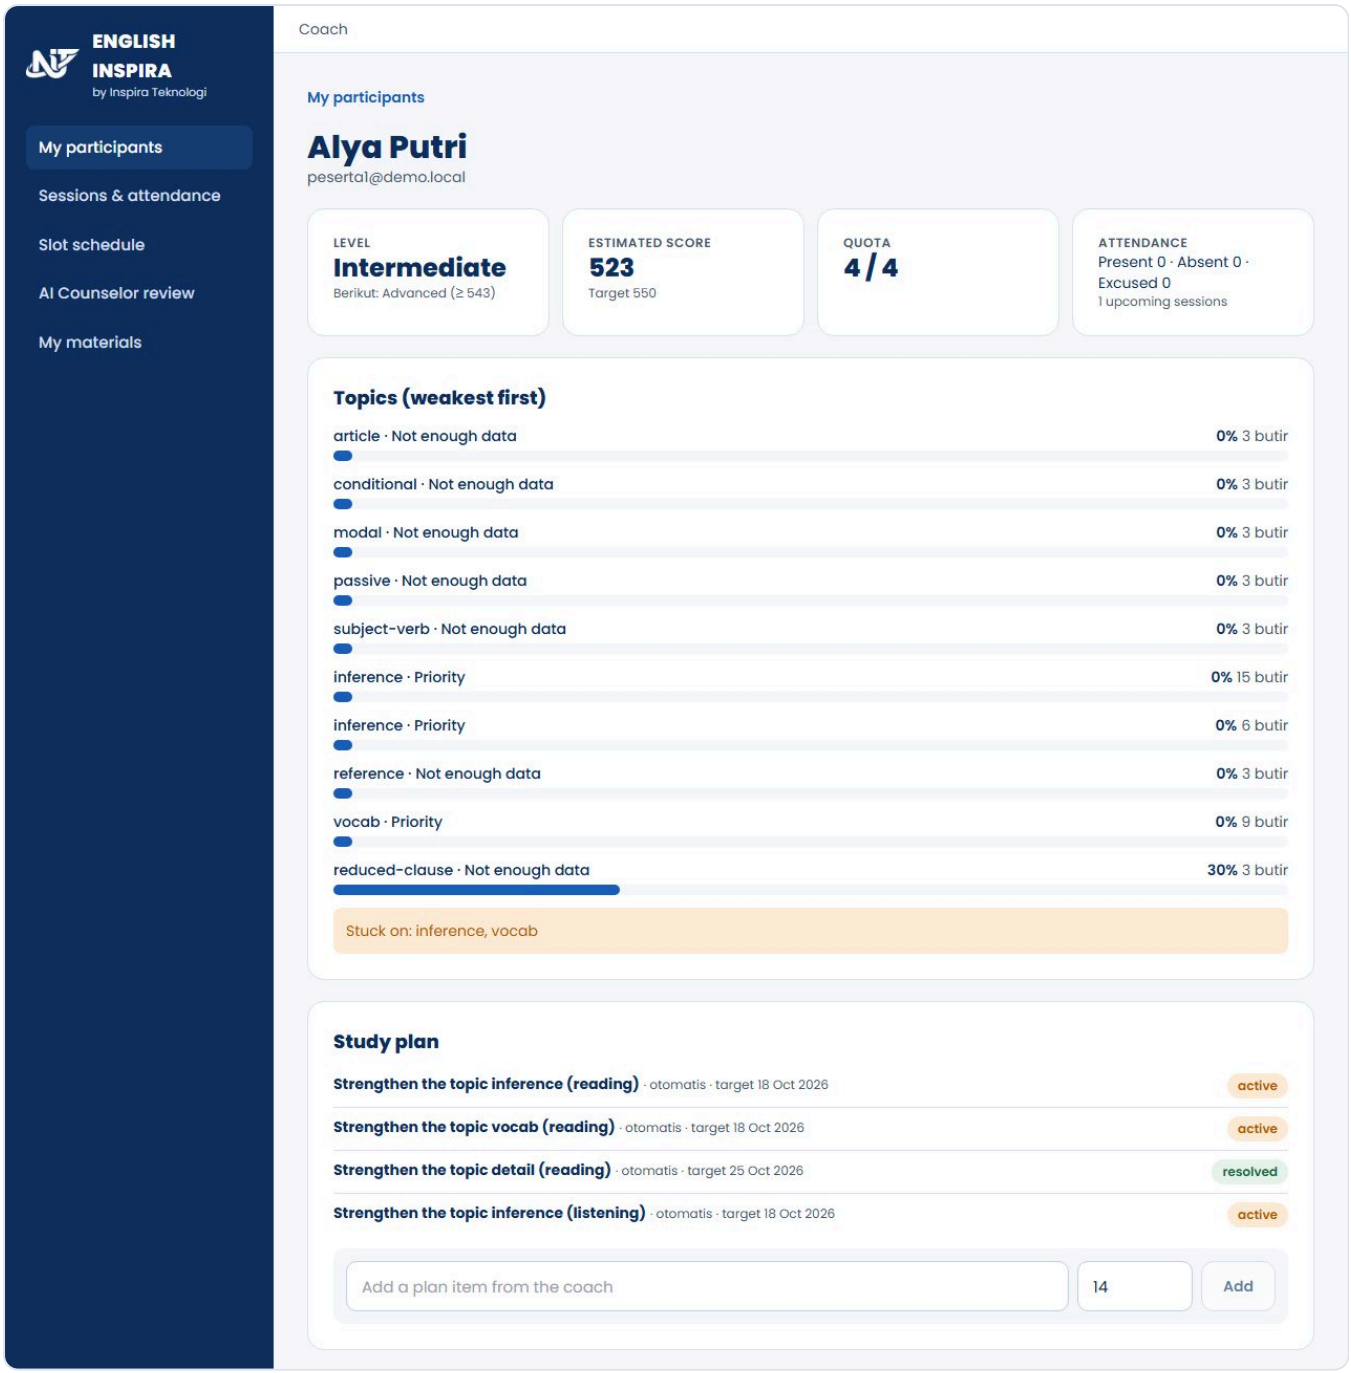

My participants.

Participant profile (pre-session brief)

Open a participant to see their level and score, weak topics, attendance, study plan, and test history. Use it before each session.

- **Add plan item**: give the participant a task with a deadline. Items you add are never overwritten by the system.
- **Allow placement retake**: let the participant take the placement test again (a reason is required).

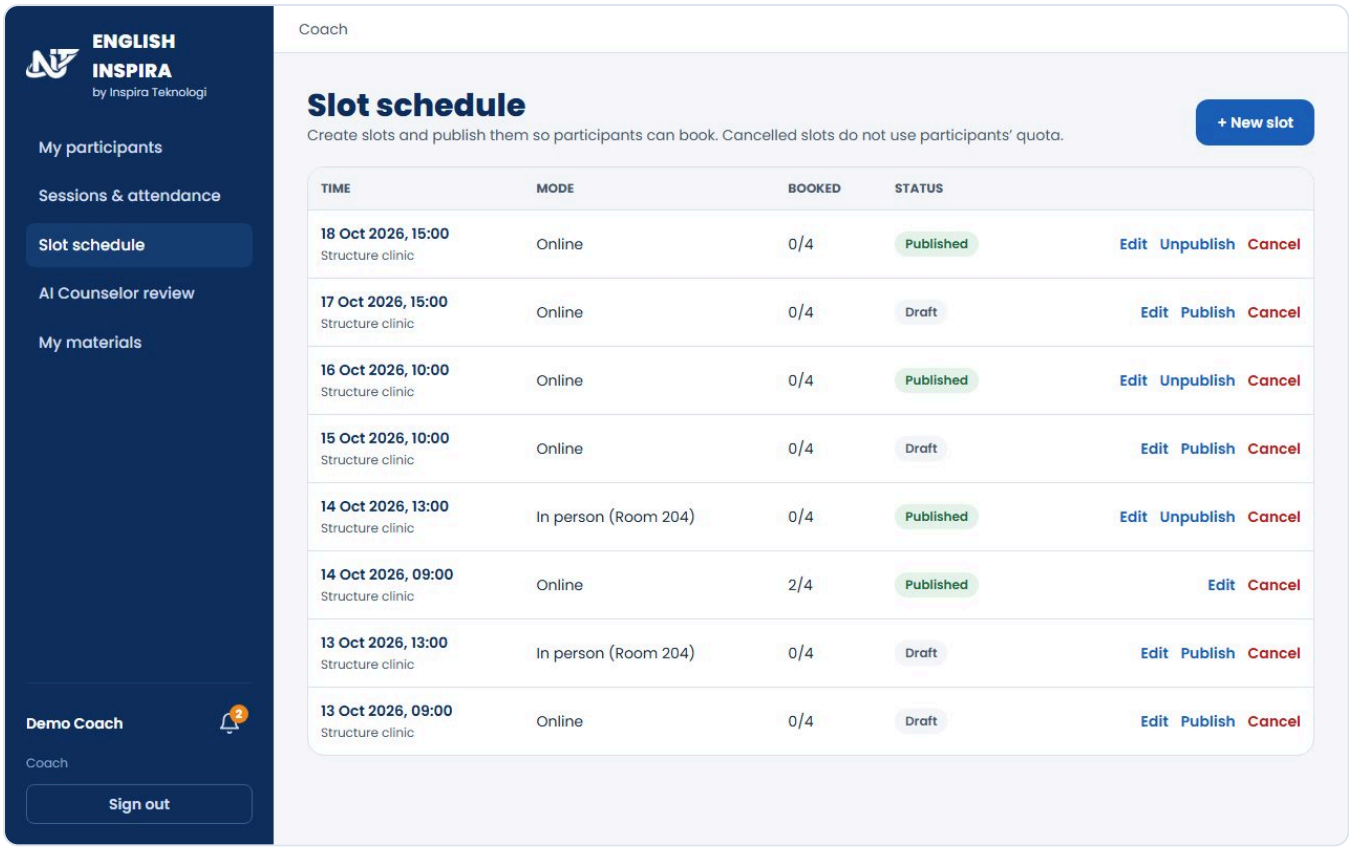

Participant profile for coaches.

3.2 Slot schedule

You decide the coaching schedule. Participants can only book slots you have published.

1. Open **Slot schedule** and click **+ New slot**.
2. Set the date and time, mode (online with a meeting link, or in person with a room), and capacity.
3. Save. The slot is a **Draft** and not visible to participants yet.
4. Click **Publish** to open it for booking.

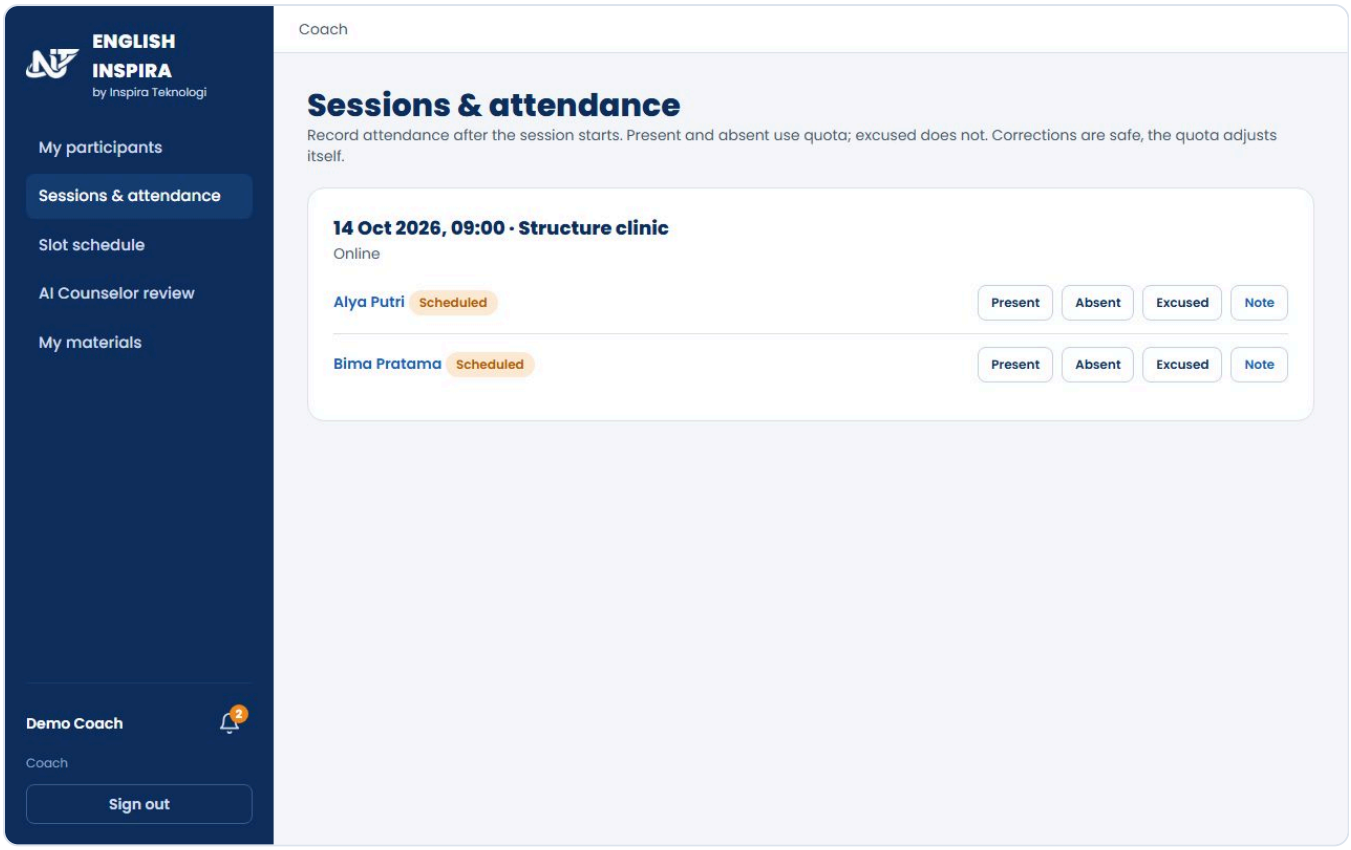

Slot schedule: draft and published slots, with Edit, Publish, Unpublish, and Cancel.

- Slots of one coach cannot overlap, and cannot be created in the past.
- Changing or cancelling a slot notifies the booked participants by email and notification. A coach cancellation does not use their quota.

3.3 Sessions and attendance

1. Open **Sessions & attendance**.
2. After the session, mark each participant **Present**, **Absent**, or **Excused**.
3. Write a note: a private note for coaches, and an optional shared note the participant can see.
4. Tick **Recommend level up** if the participant is ready.

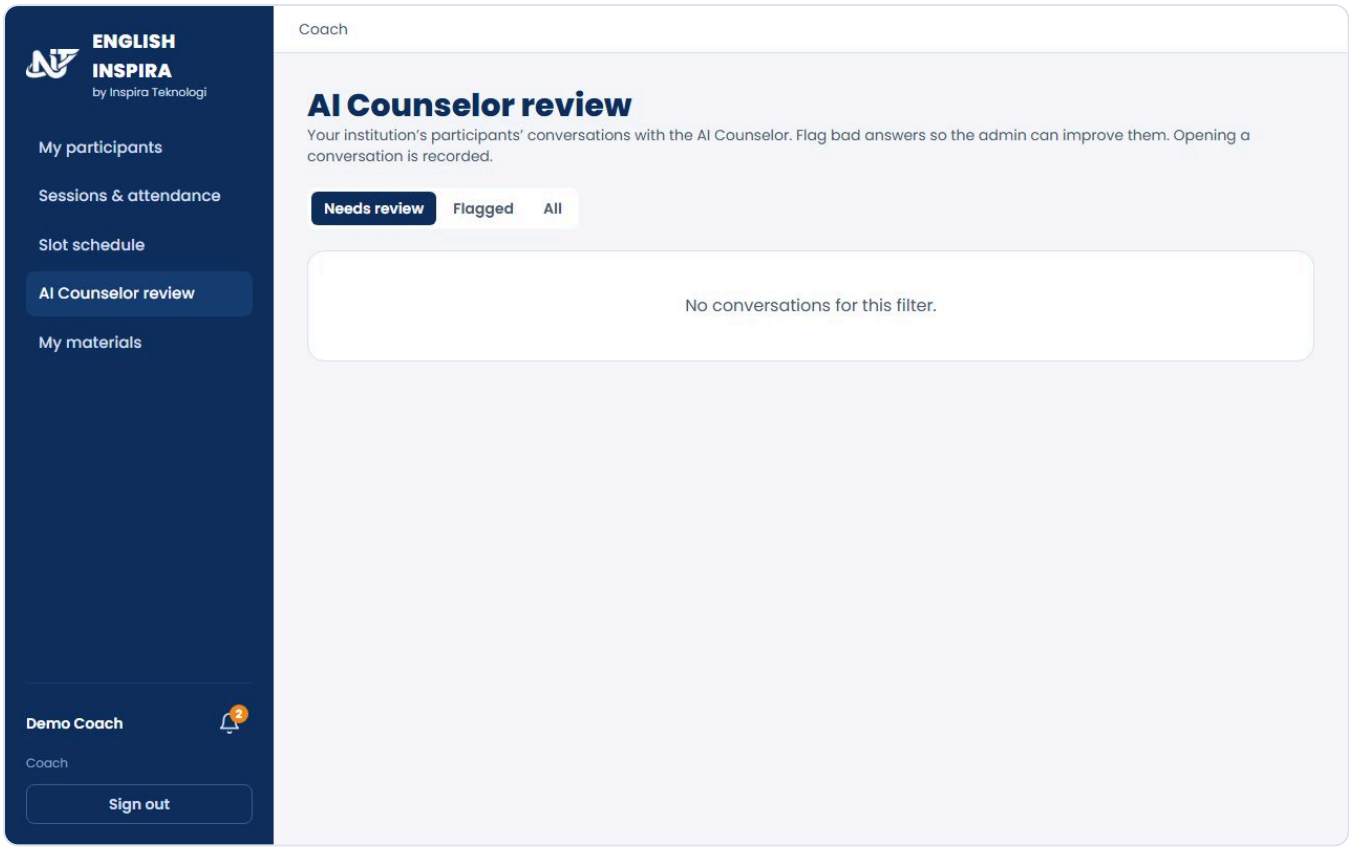

Sessions & attendance.

Tip Attendance updates the participant's quota: present and absent use a session, excused does not. Recording attendance twice never uses the quota twice.

3.4 AI Counselor review and materials

- **AI Counselor review**: read your participants' counselor conversations that need review, flag bad answers, and mark them reviewed. Your access is recorded in the audit log.
- **My materials**: write rich text materials for your institution. Only participants of your institution can see them.

AI Counselor review.

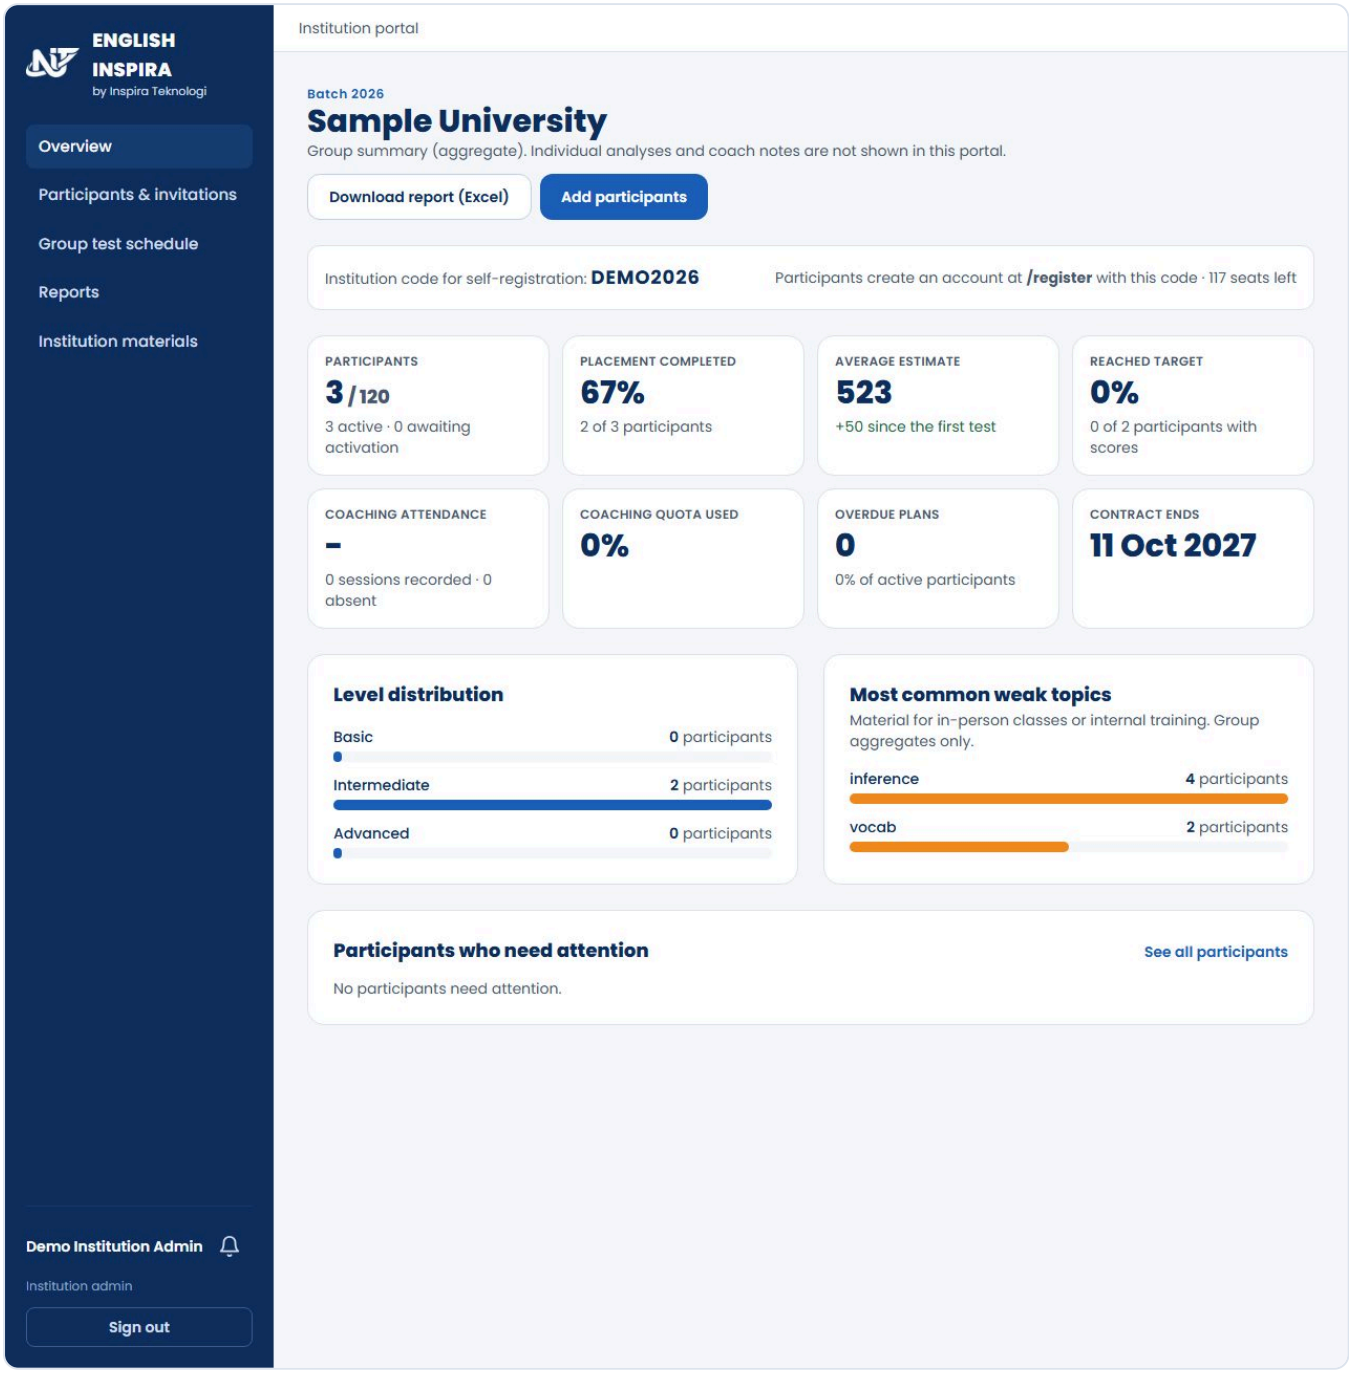

PART 4

Institution admin guide

Bring your participants in, follow their progress as a group, and download reports.

4.1 Overview

The overview shows participants and seats, placement completion, average estimate and progress, level distribution, coaching use, and participants who need attention. Individual analyses and coach notes stay private.

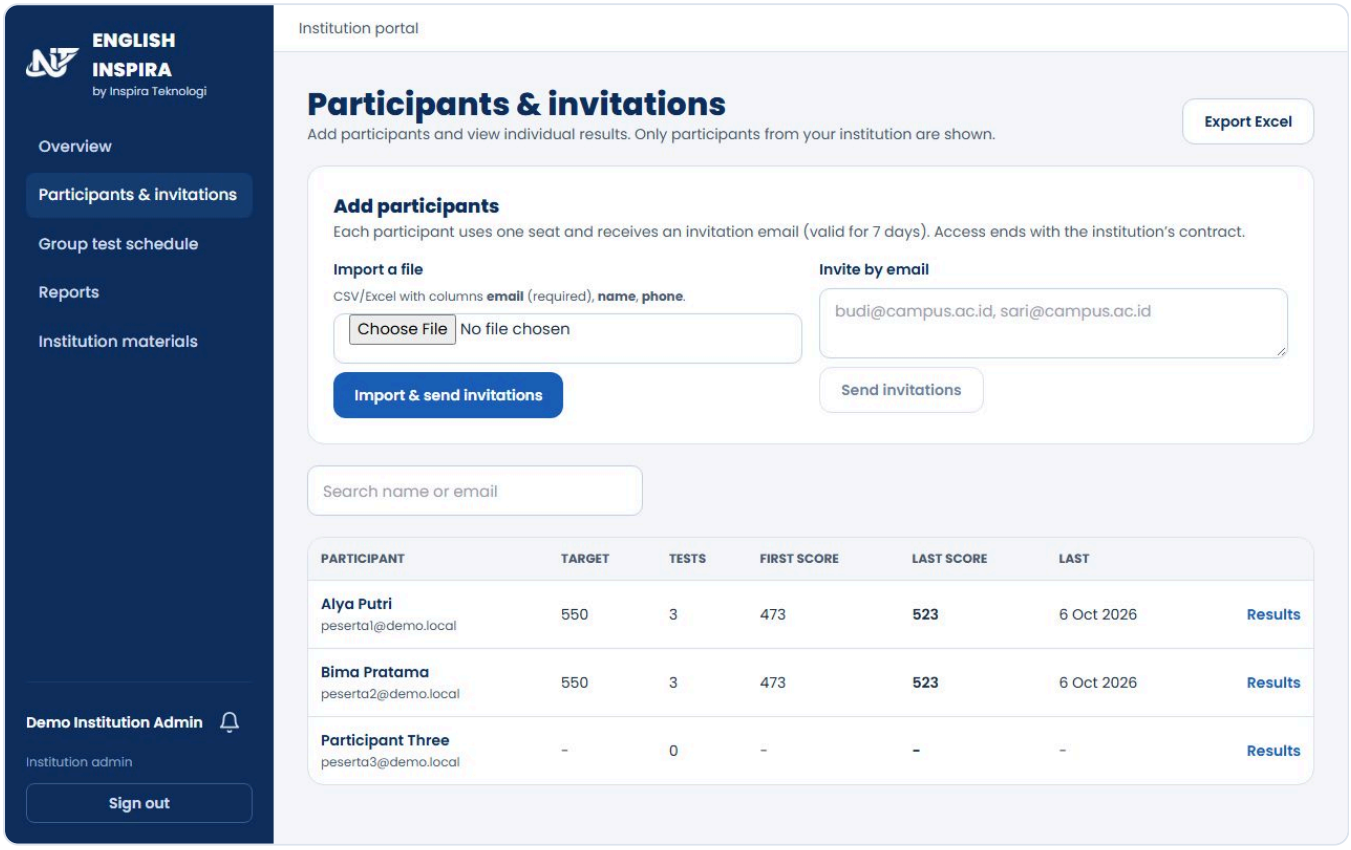

Institution overview with the institution code.

Tip The **institution code** at the top is what participants use to create their own account at **/register** . Share it only with your participants.

4.2 Participants and invitations

There are two ways to add participants:

Method	How
Institution code	Share the code. Participants register themselves and verify their email.
Import and invite	Upload a CSV or Excel file (columns: email, name, phone). Each participant receives an invitation email valid for 7 days. Failed rows are listed with the reason.

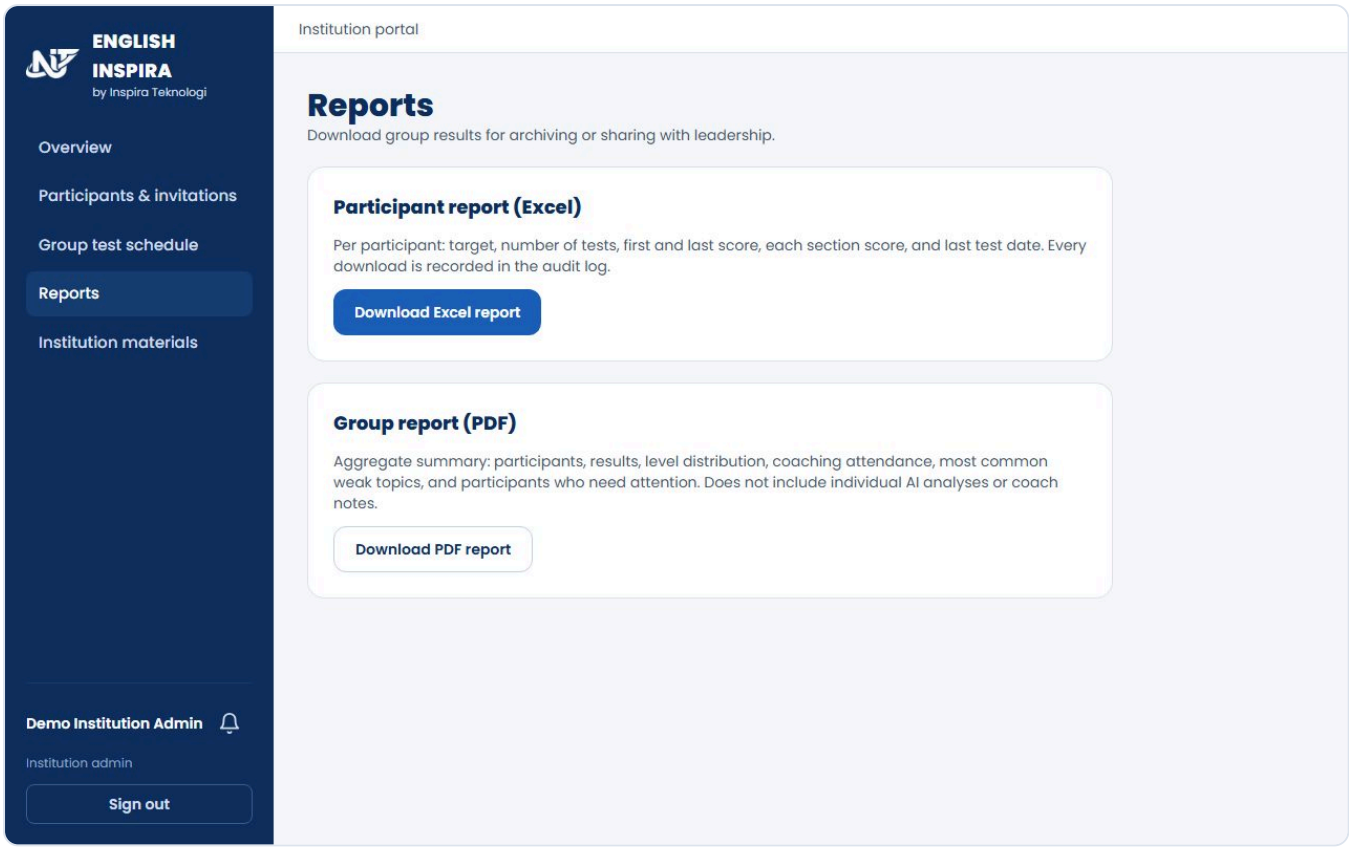

Participants & invitations: import, invite, and the participant list.

Important Each participant uses one seat. Imports or registrations above the seat limit are rejected. Access ends with the institution's contract.

4.3 Group schedule and reports

- **Group test schedule**: participants of your institution registered for the official ITP and their document status.
- **Reports**: download the participant report (Excel) and the group report (PDF).

PART 5

Admin guide

Manage institutions, accounts, content, tests, and the whole platform, including maintenance mode.

5.1 Admin sign-in

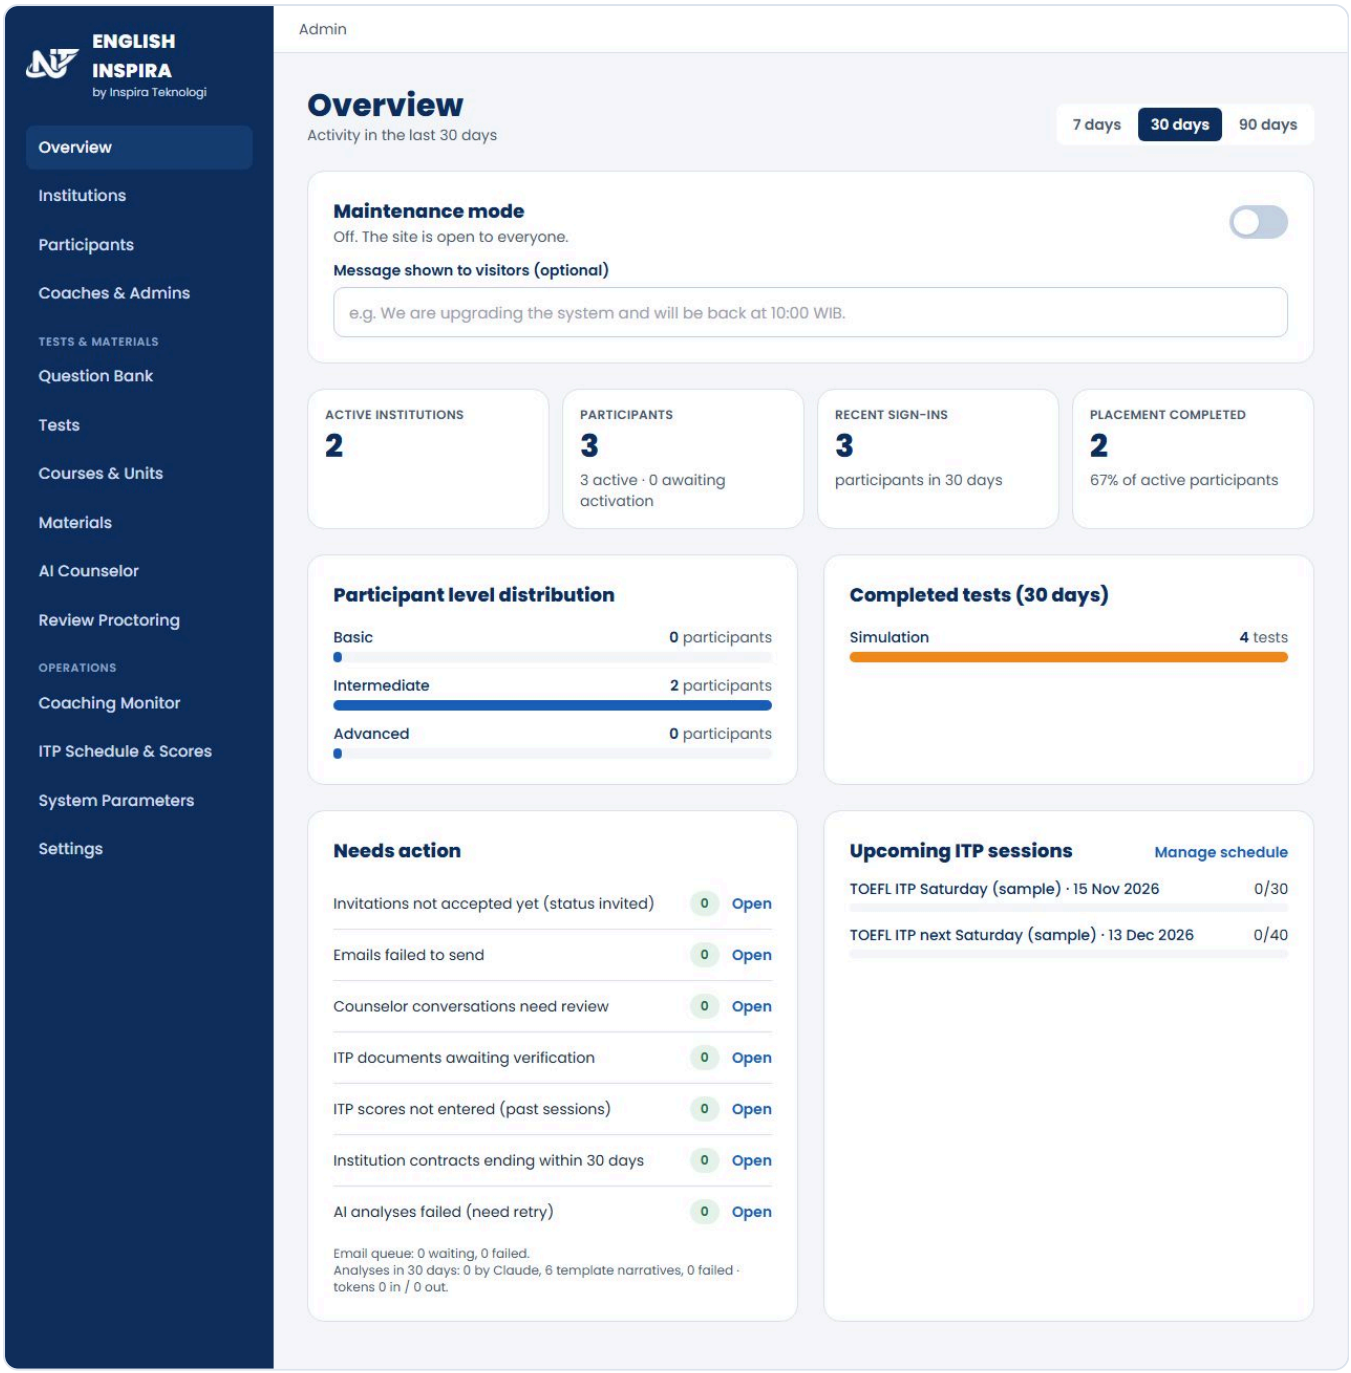

Admins sign in at **https://english.edulyfe.id/admin/login** (password or email code). This page rejects non-admin accounts and stays open during maintenance.

Admin sign-in.

5.2 Overview and maintenance mode

The overview shows active institutions, participants, recent sign-ins, placement completion, things that need action, mail queue, AI usage, upcoming ITP sessions, and contracts ending soon.

Admin overview with the Maintenance mode card at the top.

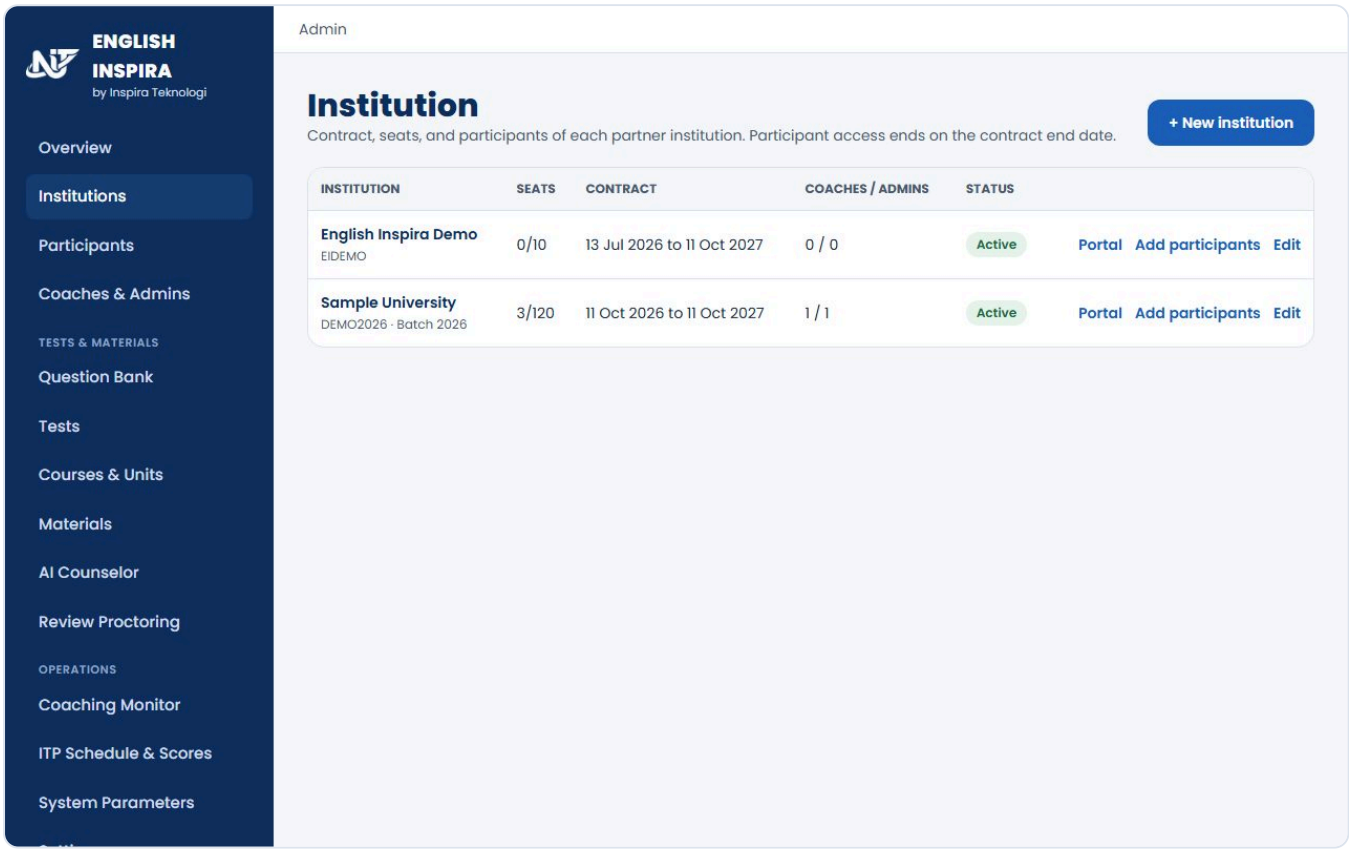

Maintenance mode

1. Optionally type a message for visitors, for example "We will be back at 10:00 WIB".
2. Turn the **Maintenance mode** switch on and confirm.
3. Within 10 seconds, everyone except admins sees the maintenance page. Admins keep full access.
4. Turn the switch off when finished.

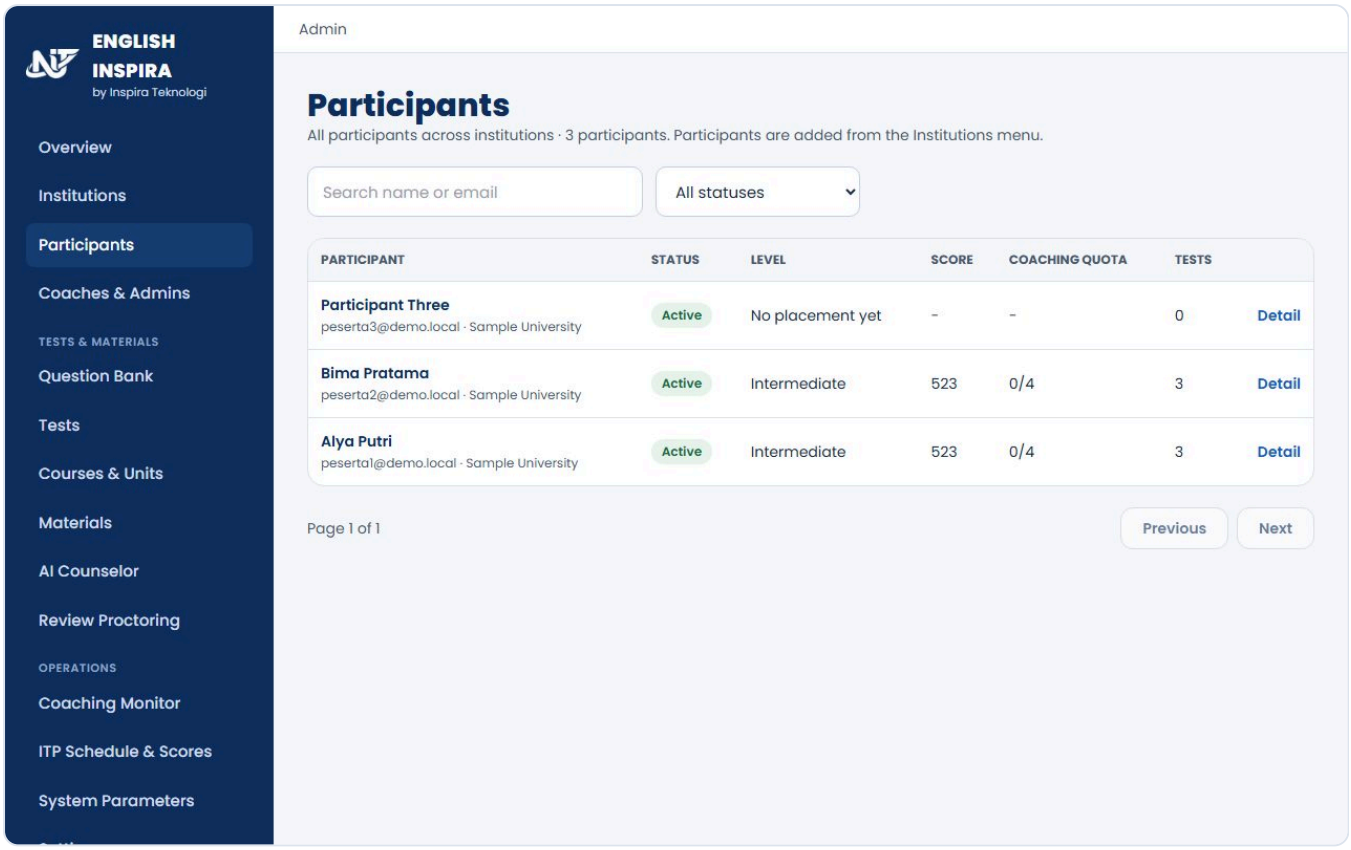

Important During maintenance, scheduled jobs (emails, reminders) keep running. Every change is recorded in the audit log.

5.3 Institutions, participants, and staff

- **Institutions**: create institutions with a name, **institution code** (used for self-registration), seats, contract dates, and contact. Add participants from here.
- **Participants**: all participants across institutions, with status, level, score, and detail (enrollment, tests, extend access, activate or deactivate, delete personal data).
- **Coaches & Admins**: create coaches and institution admins (linked to an institution) and other admins.

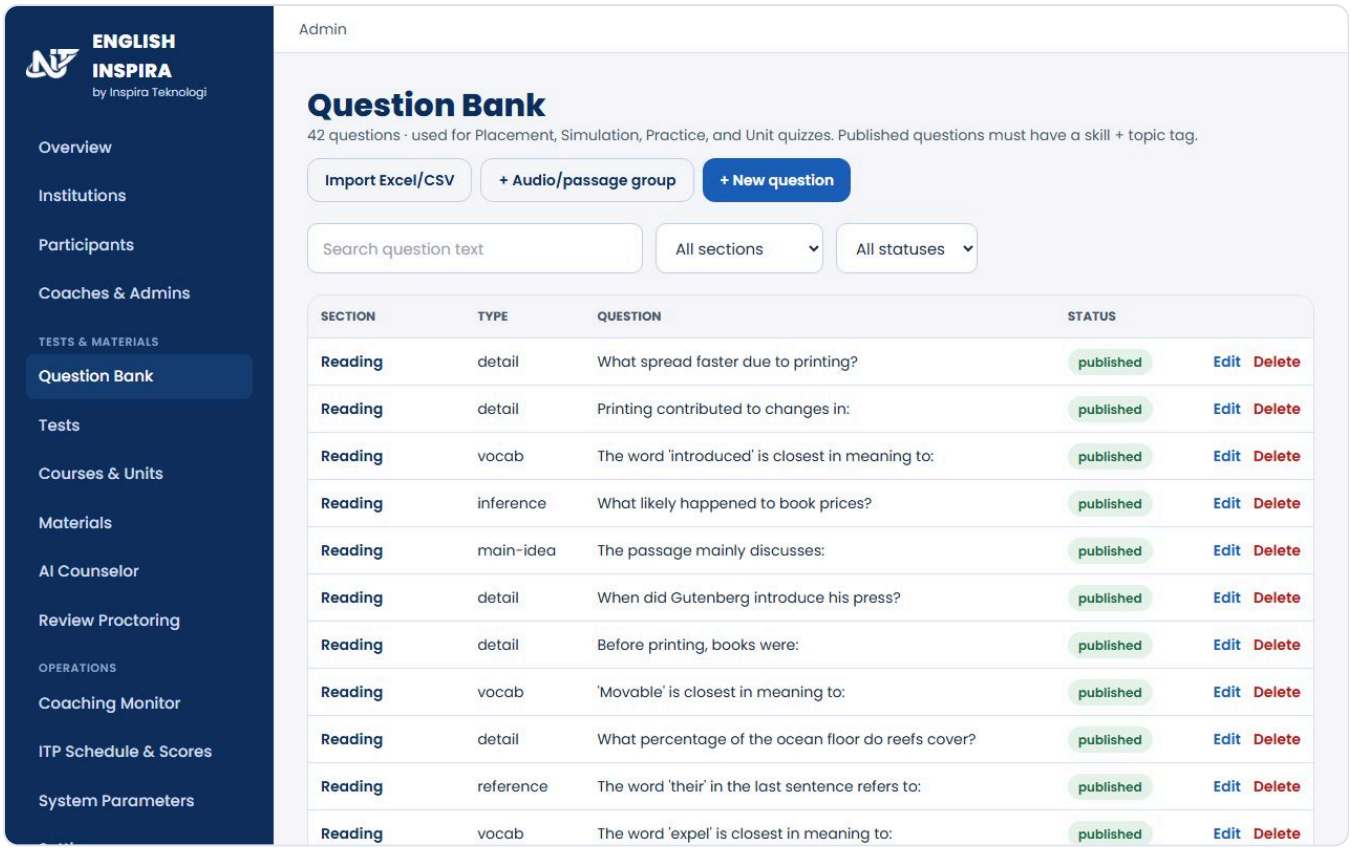

Institutions.

Participants.

5.4 Question bank and tests

- **Question Bank**: write questions with options, answer key, explanation, difficulty, and a required **skill:topic** tag. Listening questions use an audio group (upload MP3). Import many questions from CSV or Excel (download the template first; use the check-only mode before importing).
- **Tests**: assemble Placement, Simulation, Practice, and Unit quiz tests from published questions, with sections and durations.

Question Bank.

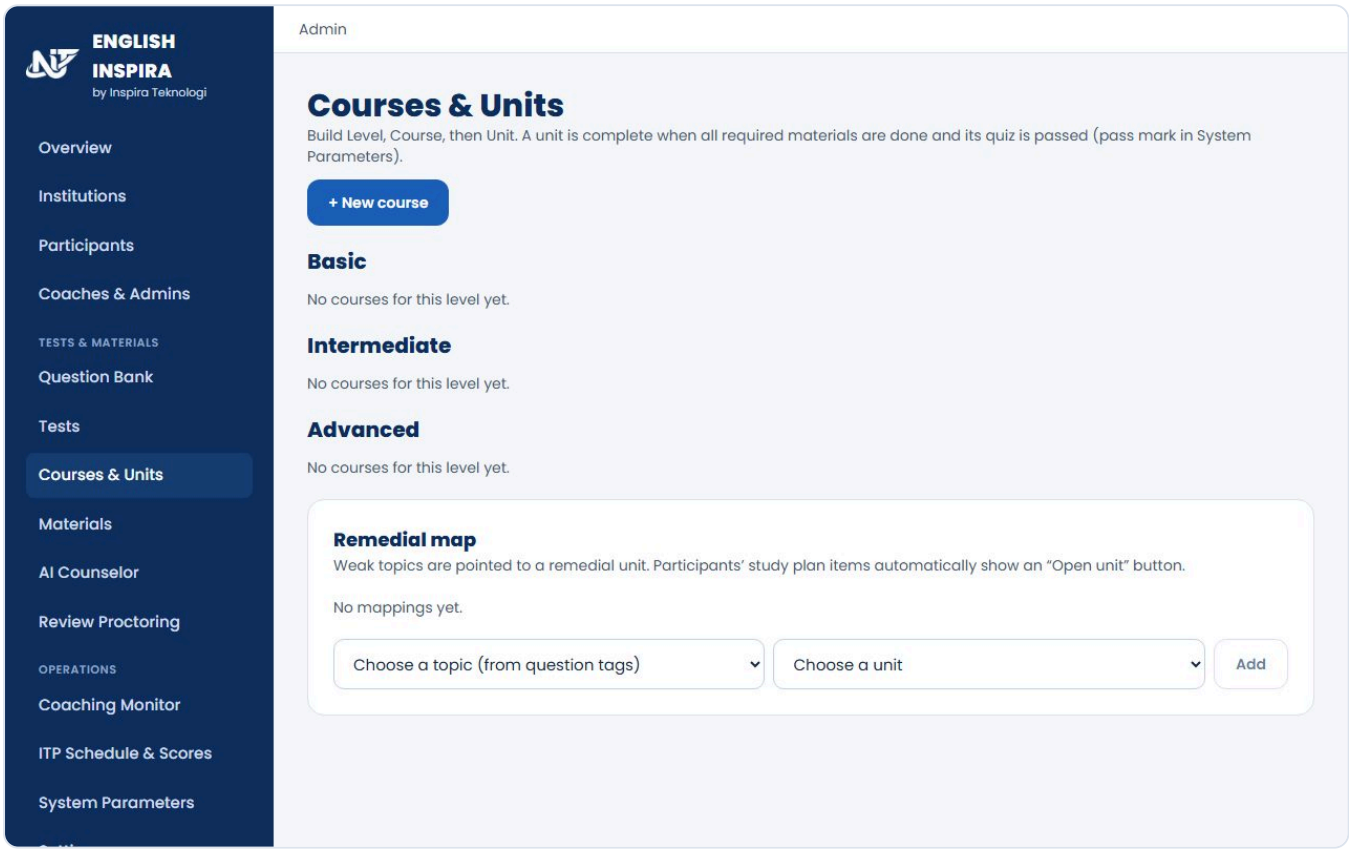

Tests.

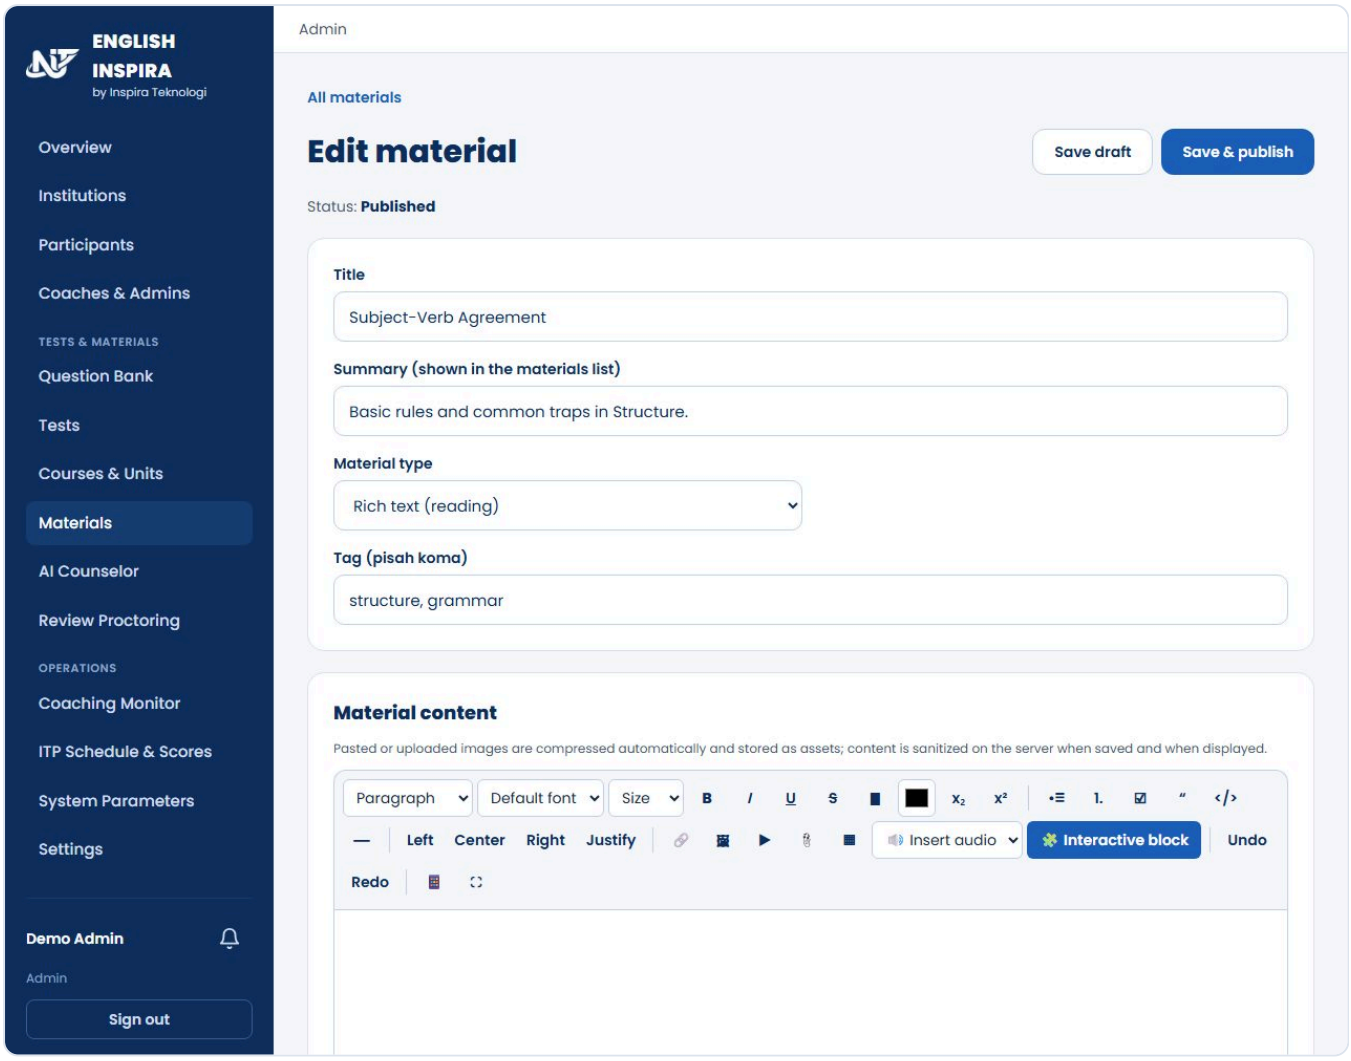

Important Score conversion tables and level ranges are placeholders until verified. Check **System Parameters** before going live.

5.5 Courses, materials, and remedial map

- **Courses & Units**: build Level, Course, Unit. Each unit has required materials and an optional quiz. The **remedial map** links weak topics to units, so study plan items show an **Open unit** button.
- **Materials**: rich text (editor with images, tables, audio, YouTube, interactive blocks) or interactive HTML. HTML materials run in an isolated sandbox and must be reviewed before publishing. Every version can be restored.

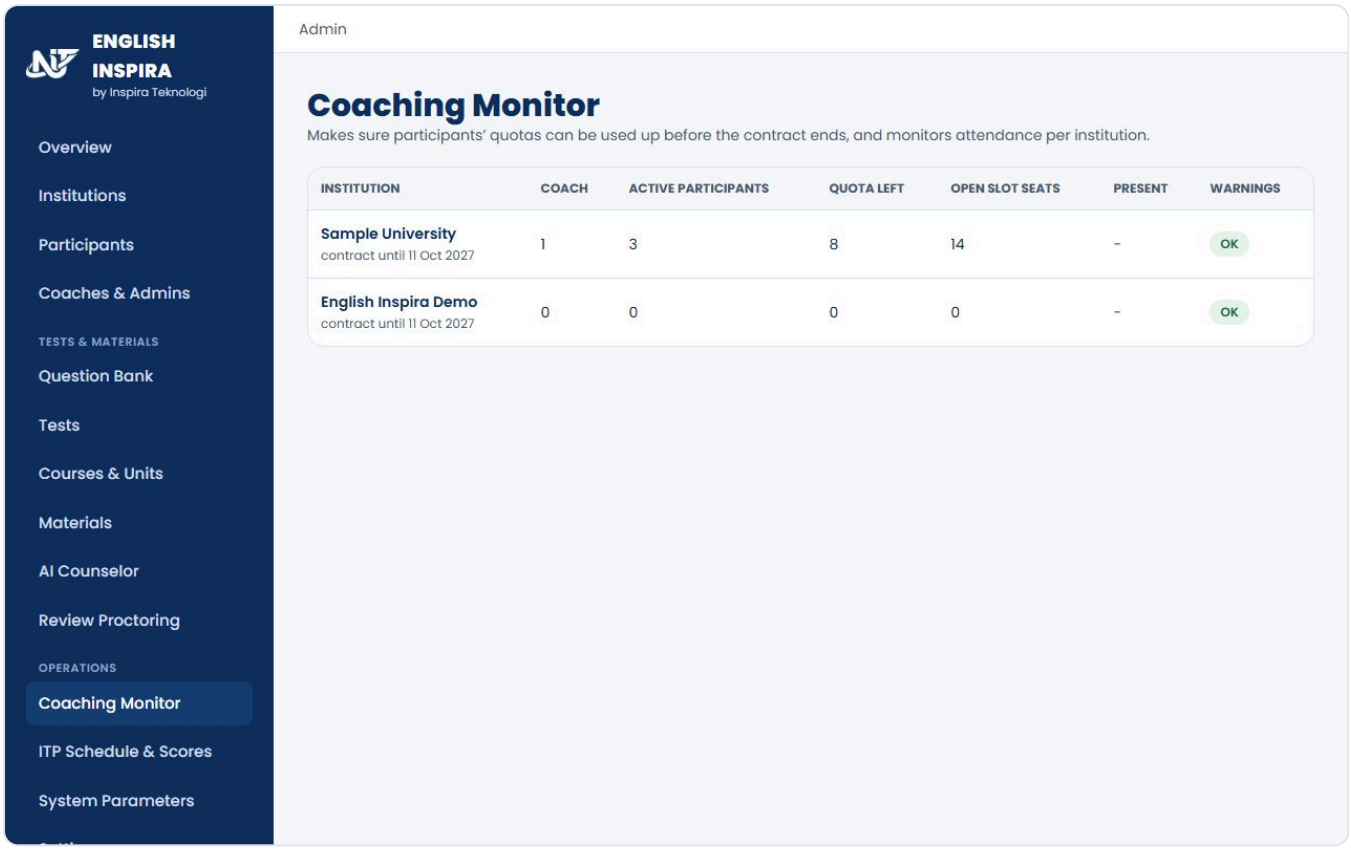

Courses & Units with the remedial map.

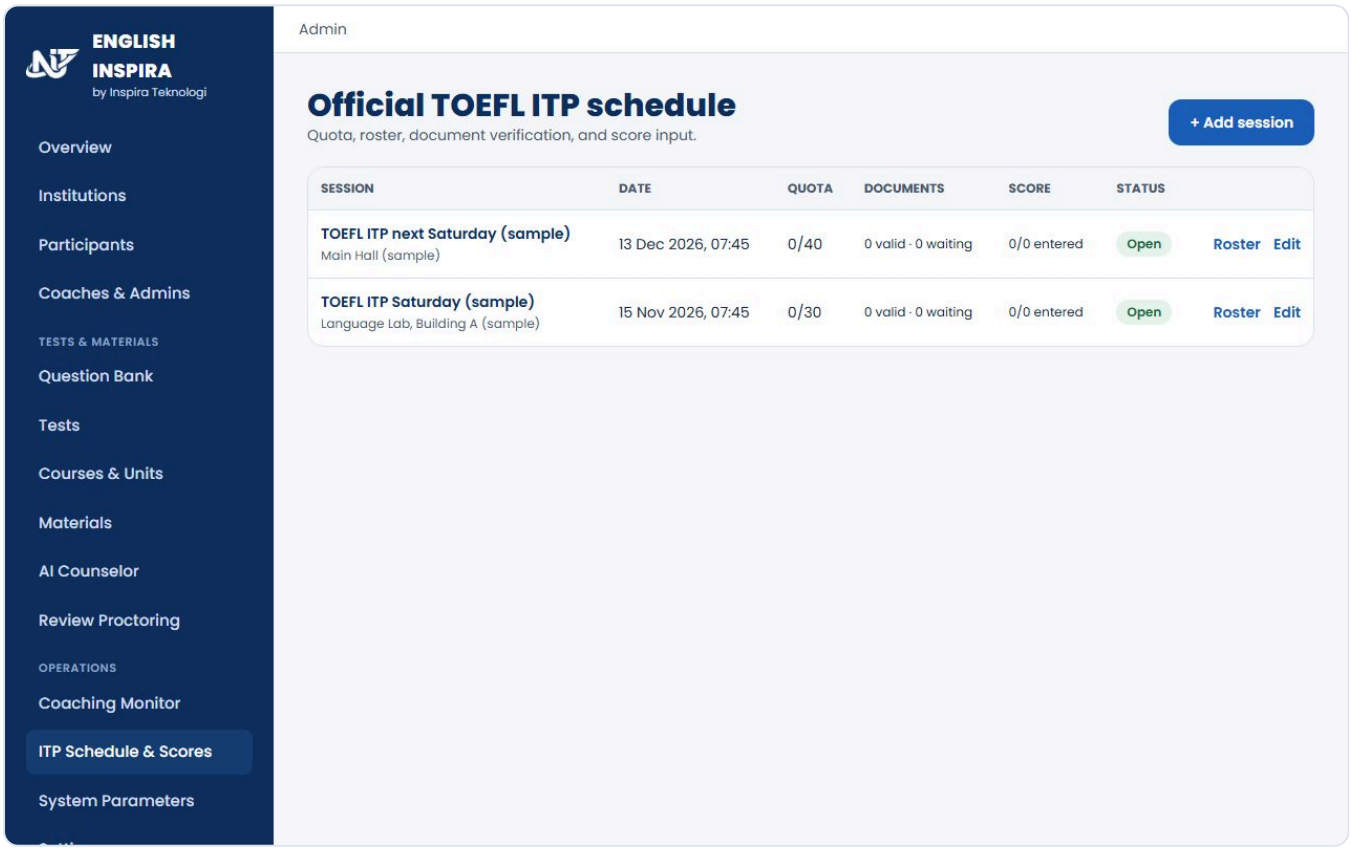

Material editor.

5.6 AI Counselor, proctoring, coaching, and official ITP

- **AI Counselor**: AI status, usage, helpful rating, and conversations to review or flag.
- **Review Proctoring**: attempts with activity notes (tab switches, leaving fullscreen). Mark them clean, suspicious, or invalid.
- **Coaching Monitor**: per institution, coaches, quota left versus open seats, attendance, and warnings (for example not enough slots before the contract ends).
- **ITP Schedule & Scores**: create official ITP sessions, verify participants' documents, enter scores (manually or from Excel), export the roster, and issue certificates.

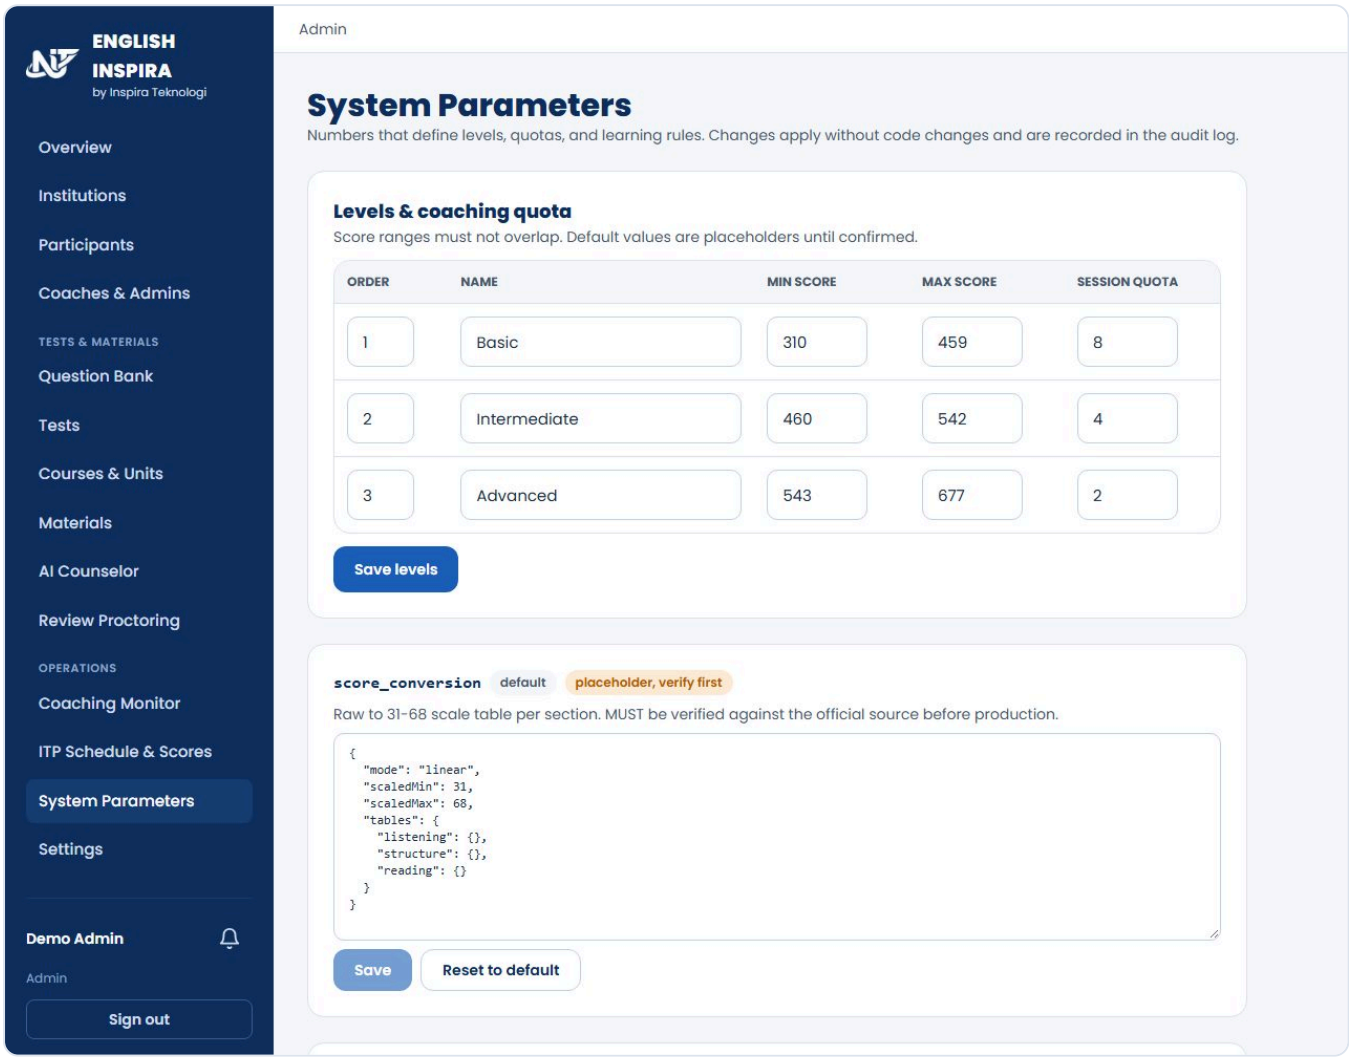

Coaching Monitor.

ITP Schedule & Scores.

5.7 System parameters and settings

- **System Parameters**: level ranges and coaching quotas, score conversion, weakness thresholds, unit pass score, booking rules, AI Counselor monthly limit, and other values. Changes apply without code changes.
- **Settings**: product name, support email and WhatsApp (shown on the website and in Help), official test partner, reschedule rules, and data retention.

System Parameters.

PART 6

Troubleshooting

Quick answers to the most common problems.

6.1 Common problems

Problem	What to do
"Wrong email or password"	Check spelling and spaces. Never set a password? Use the **Email code** tab or **Forgot password**.
The sign-in code does not arrive	Check the spam folder. Wait 60 seconds and request a new code. Use the code from the **newest** email (it is in the subject).
"Wrong code"	You probably used an older code. Open the newest email. After 5 wrong attempts the code locks; request a new one.
"Your access has ended"	Your institution's contract has ended or your account was deactivated. Contact your institution admin.
The institution code is rejected	Check the code with your institution. The institution may have no seats left.
The website shows a maintenance page	The site is being updated. Try again later. Admins can still sign in at /admin/login.
"Something went wrong" after an update	Reload the page (Ctrl+Shift+R on a computer).
Listening audio does not play	Check volume and headphones, then click **Reload audio**. Reloading after a loading failure does not count as replaying.
The test stopped halfway	Open **My Tests** and click **Continue**. Time and answers are kept by the server.

Still need help? Open **Help** in the app for the support contact, or ask your institution admin.
